

Hosein Nikmaram, a young author genius in iran

Tehran, Iran Feb 9, 2022 ([Issuewire.com](https://www.Issuewire.com)) - Personal introduction

[Hosein NikMaram](#) (born on December 3, 1996) is the founder and CEO of “ **Dadeh Gostar** “ since 2015. He was born in the “**Neyshabour**” and he started his scientific and professional activities in various fields of the computer from a young age. He completed his university education in two different majors of software and artificial intelligence in the field of computer engineering, from the **Islamic Azad University**, successfully. He also has various and valuable scientific achievements.

Scientific achievements

[Hosein Nikmaram](#), is one of those hard-working people whose reputation for scientific honors and his hard-working in the science and **the technology** industry in Iran is not hidden from anyone. He started learning programming at an early age, purely with his own interest and his personal effort. He began his career with **Front-end** programming. Over time and he gained more experience in this field, he moved to **Back-end** programming and developed his deep talent in this

field.

He uses this knowledge in various fields, such as web development with PHP, development, and programming of mobile applications with Java, and more importantly, he uses his unique knowledge for developing smart contracts based on a variety of **Blockchains** that was used, for example, **Ethereum, Matic, Tron, Binance Smart Chain** with Solidity programming language, which this expert focused on well and brought them to the implementation stage.

Honors and collaborations

Some of the honors of this young and hard-working expert include the following:

A- Achieving top rankings from "Startup Weekend" events in different universities.

B- Obtaining the top rank from the fourth course of "mobile programming marathon" from "Sanati Sharif University" in Tehran.

C- Achieving the top rank from the "11th National Festival" of Top Ideas.

Hosein Nikmaram has also written as a co_author from some books in this field. For example, his valuable books include "**Basics of**

Blockchain and Cryptocurrencies" and "**Integration of Blockchain and Artificial Intelligence**" and more than a dozen other related articles.

Personal and work targets

Fortunately, our expert has perfect experience in scientific fields such as **blockchain** and **cryptocurrencies**. The professional ability and rich background of this expert are provable by presenting a "**Delegated Proof of Performance consensus algorithm**", that this algorithm was written by the mentioned expert and submitted to the "**DAO**" "decentralized organizations". Also, it should be noted that this algorithm is completely new and up-to-date, so has a different function from previous algorithms.
