

## Hostaccent has added some new features on Linux hosting

**London, United Kingdom Feb 1, 2022** ([Issuewire.com](http://Issuewire.com)) - [Hostaccent](http://Hostaccent) web hosting service has provided some new surprises.

They have updated the security of their Lirax web hosting Servers.

Currently, they will provide 6 Layer of security to their customers.

Hostaccent has further updated its Storage. Currently, they are providing NVMe Storage on All [Linux web hosting](#) packages.

They currently have 14 Cloud datacenters locations. Hostaccent is providing 14 Datacenter locations of [SSD cloud VPS](#) servers.

DDOS protection is included on the server so there is no fear of DDOS attacks on the website.

Daily and weekly backup are enabled on the server so there is no fear of data loss.

There is the facility to install the one-click app on the server so that a website CMS can be installed in minutes.
