

How Claudy Destin, professionally known as Claudy Beats got into entrepreneurship and music

Vision, that's what was driving him...

he woke up and felt lost in the cloud in late 2018

While scrolling through Youtube and came across a motivational video on Dani Johnson's Youtube channel; to his surprise, by looking at the video description, Dani had a FREE copy of her book "[First Steps To Wealth](#)"...Claudy Beats grabbed a copy and read it in one day because he was so excited about his journey in entrepreneurship.

Later then, he started his first business which was Affiliate Marketing, nothing really worked for him...He quit cold turkey! eventually wrote his book "[Turning Your Instagram Into A Cash Machine](#)" where he teaches people how to start their own online business with 0 money unless they have passion for something or are good at doing something.

Not only that, he has helped hundreds of people to grow their brand and Instagram with his course "[IG Growth Academy](#)" - His Secrets & Strategies really helped me take my brand to the next level

And soon again he taught himself English and music production...

To tell you, his drive was pushing him to go past his limited beliefs...

Which got him to work and collaborate with some great people in the entrepreneurial world and music industry like Lillie Jean, Junior Galette, Azazus, Shesovegan, Bob Cailloux, Maria Smith, Fax Savage, H Pamay, Blacc Tiger, Malcom, G-stro...And many more.

Perseverance was the key for Claudy Beats because he never stops, he's always doing something no matter how hard things are - You know he's from Haiti,

Claudy Beats "forgets about the scars he had in his past and he focuses on his end goal and the vision that he wants to realize even though most don't understand him...He said."
