General dentists provide a wide array of services that are vital to patients' continued health. These services include: preventive services, including helping to maintain good oral health by stopping disease before it takes hold in the mouth; restorative services, such as receiving timely and appropriate treatment when a problem is identified; as well as cosmetic services, including performing a range of cosmetic procedures, such as teeth whitening, cosmetic bonding, and even porcelain veneers. General dentists also address overall health concerns as oral health is seen as the mirror of general health. In fact, some dental problems may reflect issues in other parts of the body and vice versa.

A lover of sports, Dr. Rousseau played softball in college. She has a dog, Zero, and two cats, Chooch and Dory. When she isn't practicing dentistry, she enjoys spending quality time with her husband, Brian, and their children, Reagan and Jack.
