

LudoP2E PTY LTD. Launches play-to-earn online version of popular Ludo board game

Sydney, New South Wales Feb 12, 2022 ([Issuewire.com](https://www.issuewire.com)) - LUDOP2E PTY LTD. LAUNCHES PLAY-TO-EARN ONLINE VERSION OF POPULAR LUDO BOARD GAME

One of the best board games is soon to be a popular play-to-earn game. The traditional Ludo board game has been converted into a play-to-earn online game by LudoP2E Pty Ltd. Players will be able to earn \$LudoP2E each time they play.

The play-to-earn space has exploded in popularity. In fact, there are arguably more people playing online than playing traditional board games. Therefore, it makes sense that popular board games such as Ludo are making their way online. The play-to-earn component of the online game is likely to attract a whole new generation of players.

What is \$LudoP2E?

\$LudoP2E is an online, multiplayer play-to-earn board game. A player will have multiple possibilities to earn in-game rewards as a winner on each gameplay or via the leaderboard system. Players are rewarded with the native token \$LudoP2E that is deployed on Binance Smart Chain (BSC BEP-20). The tokens can then be converted into Binance coins which can then be converted to other crypto or fiat currencies.

The Gameplay of \$LudoP2E

The gameplay of \$LudoP2E is designed to be beginner-friendly. Even those unfamiliar with the traditional board game will be able to quickly understand it. In the game, four players are chosen at random. Each player will roll the dice with the highest scorer getting to play first. The game begins with each player rolling the die in turn. To begin moving a piece around the board, a player must roll a six or a one. When a player has multiple pieces in play, he or she may pick which piece to move. The game finishes when all four pieces have made it to the centre of the board. The winner of the game is the first person to reach the centre of the board. The remaining players then compete for second, third, and fourth place.

How Can Players Earn Money in \$LudoP2E?

Players can earn \$LudoP2E through in-game rewards and leaderboard rewards. At the beginning of each game, each player deposits 100 \$LudoP2E tokens. The winner takes the majority of all the players' tokens while others will have their tokens deducted.

To help drive continued interaction with the game, the top four scorers each day, week, and month are also rewarded with \$LudoP2E tokens. Here's how it works: players will receive a score based on their ranking at the end of each game. These scores will be figured into the daily, weekly, and monthly leaderboard standing. The leaderboard rewards will be awarded as follows:

- Daily 100x
- Weekly 1000x
- Monthly 10,000x

At the beginning of each month, a multiplier will be released that will apply to all daily/weekly/monthly rewards.

What are the Tokenomics of \$LudoP2E?

There is a total supply of 1,000,000,000 \$LudoP2E planned. 60% of the supply will be available for a presale and public sale while 20% will be reserved for staking rewards. Another 10% will be available for game rewards with the final 10% being split between marketing and team distributions.

To ensure the integrity of the token, 90% of the marketing and development tokens will be locked at launch and vested at 5% each month. The team wallet will be locked at 100% for the first three months. Also, the game rewards wallet will be locked until the launch of the game.

Big Roadmap Plans for \$LudoP2E

The roadmap for \$LudoP2E includes time for development and presale for the token during the first quarter of 2022. The second quarter of 2022 will include phase 2 of the marketing campaign, leaderboard launch, and a tier-one audit as well as a preliminary exchange listing. During the third quarter of 2022, the project will launch the third phase of its marketing plan along with tier 2 exchange listing and the development of a LudoP2E 3D game design. Finally, the fourth quarter of 2022 will bring the launch of the LudoP2E 3D Game along with tier 1 exchange availability and metaverse partnerships with Sandbox, Bloktopia, and other similar platforms.

Bringing a Popular Game to the Online and Metaverse Play-to-Earn World

\$LUDOP2E seeks to bring a wide audience of board game fans into the play-to-earn world with a

simple, addictive, and exciting gaming experience. With a robust roadmap in place, \$LUDOP2E will expand the gaming experience into the metaverse to bring even more players into this run play-to-earn game.
