

NAKA GAMES: NFT Rewards Platform

Los Angeles, California Feb 17, 2022 ([Issuewire.com](https://www.issuewire.com)) - At the beginning of 2022, NFTs took a quite major place in our lives. NFTs are digital assets that represent real-world objects such as art, music, in-game items, and videos. They are often bought and sold online using cryptocurrencies and encoded in the same underlying software as many cryptocurrencies. NFT innovation will significantly affect different businesses like film, music, gaming, concerts, ticketing, travel, stocks, crowdfunding, banking, real estate, lending, and much more. Naka Games was created to appreciate your energy for your favorite past-times, recreations, motion pictures, music, income opportunities, and more. Naka Games' vision is to improve our world and lives by adopting and using blockchain technologies.

Naka Games allows us to look at the world of NFT from a unique perspective. It is an NFT Rewards Platform that is a Blockchain-based solution for keeping track of customer reward points and creating a shared transaction ledger between all involved brands. While Naka Games comes across as an NFT Platform, it offers you the chance to win NFT rewards by offering different games and services. In

addition, the friend you invite and play the game with also wins NFT rewards with you.

Have you ever thought about why NFTs are so valuable? NFTs are valuable because they ensure that irreplaceable items are authentic. This differentiates assets as unique. Picasso's work is not transferable. While everyone can reproduce his paintings, the originals are irreplaceable and unique. Thanks to NFTs, digital content becomes irreplaceable and therefore valuable.

Naka Games aims to be the world's most significant influencer platform by creating a system where everyone wins. Everyone wins by doing what they already do daily but gets rewarded for their actions and influence. What are you waiting for?

Play games on Naka Games and collect NFT rewards to capture the future now.
