

Speed Trader Coin Second Pre-Sale Announcement

London, United Kingdom Feb 17, 2022 ([Issuewire.com](https://www.issuewire.com)) - Speed Trader Coin gladly announces its second pre-sale, which will start within a few days. The stock traders eagerly look forward to this moment as the agency allows them to invest in the stock market through cryptocurrency and with zero fees. The second pre-sale for SPTC tokens will initiate on February 27, 2022, after the first pre-sale that ended on February 1. The price for the second pre-sale is set to be 1 BNB = 400,000 SPTC which will lessen in the third pre-sale. There is no particular rule for the traders to follow, as the agency will allow buyers on a first-come, first-served method. All the necessary details and the pre-sale address are provided on the official website.

Speed Trader Coin allows traders to buy a minimum of 0.5 BNB and a maximum of 10 BNB since the amount of tokens is limited during the pre-sale. The willing traders can pay through the wallet and send the BNB to the corresponding pre-sale address, and the corresponding amount of SPTC tokens is sent to each user's account right after the payment. The agency aims to list Huobi, Coinbase, and Binance with 50% of the fund after the sale is over. The rest of the fund will be used to buy back the tokens to create a progressive roadmap.

Following the roadmap, Speed Trader Coin is looking forward to partnering with the giants in the industry like FP Markets, Ava Trade, and Plus 500 by the end of this quarter. By the last quarter of this year, the company is planning to implement SPTC Decentralized Exchange in order to bring more beneficial features of the traders around the world. Transparent, legitimate, and efficient, the platform empowers every trader by keeping a balance between the stock market and the crypto market. With the announcement of the second pre-sale, Richard Fritsch, the agency's CEO, assures traders with some promising prospects to grow more through fruitful transactions of SPTC tokens.
