

Yoosunglasses Emerging as the Leading OEM Supplier for Sustainable and Eco-friendly Sunglasses

Supplier for Sustainable and Eco-friendly Sunglasses

Plantation, Florida Feb 9, 2022 ([Issuewire.com](https://www.issuewire.com)) - Yoosunglasses is becoming a top choice in the sunglasses manufacturing industry among global brands and businesses seeking to mass-produce sunglasses and improve their carbon footprint. This leading OEM company is helping businesses and the environment by developing an entirely new line of eco-friendly and sustainable sunglasses.

One of the most reputable sunglasses manufacturers worldwide, Yoosunglasses has been serving high-fashion brands, eyewear wholesalers, eyewear companies, pharmacies, and fashion shops for over 12 years. With their vision of “sustainability and eco-friendliness,” the company enables diverse businesses to provide their customers with high-quality, eco-friendly sunglasses and become more sustainable. Yoosunglasses’ clients are able to choose from a variety of eco-friendly sunglasses ranging from BPA-free plastic sunglasses, to bio-based renewable castor oil sunglasses, to wheat straw sunglasses, and 100 percent recycled ocean plastic sunglasses.

As an environmentally-conscious OEM company, Yoosunglasses encourages fashion brands and the eyewear industry to find better ways to serve their customers while causing minimum damage to the environment. Decreasing their carbon footprint is a concern for many fashion brands today where

consumer consciousness is trending progressively. Yoosunglasses offers its services as a stepping stone for eyewear brands and businesses to improve their image in the eyes of their consumers in choosing eco-friendly sunglasses manufacturing.

Today, sustainability is a key driver of innovation in the eyewear industry. Businesses can attain sustainability with greater ease by collaborating with Yoosunglasses and creating an exclusive line of sunglasses made from eco-friendly materials that help reduce the existing strain on the environment.

Ocean plastic waste is one of the most devastating environmental problems today with plastic making up 80 percent of all marine debris. Plastic waste isn't just unsightly for the aesthetic appeal of oceans and beaches, it causes irreparable damage to marine species as they ingest or get entangled by plastic debris.

Fortunately, the problem of ocean plastic debris causing further harm can be prevented by making sustainable choices. Yoosunglasses believes that if fashion brands and eyewear shops choose to manufacture sunglasses made from 100 percent recycled ocean plastic, or other materials based on bio-based renewable castor oil and wheat straw, it will make a significant impact on the environment and companies' carbon footprint. The sunglasses maker also believes in the importance of increasing awareness and empowerment among consumers so that they can make better choices for the environment and, in turn, influence businesses to make more sustainable choices, as well.

About Yoosunglasses
