

A Mission To Provide Education For All - Social Welfare Event by SSSI

we conducted a social welfare event by SSSI on the topic of Oral skills, where we helped the students to develop their communication skills. At SSSI Online Tutoring Service, we ensure to provide education that can help the students in upgrading their

Noida, Uttar Pradesh Mar 1, 2022 (Issuewire.com) - Recently, we conducted a **social welfare event by SSSI** on the topic of **Oral skills**, where we helped the students to develop their communication skills. The session began at 2.30 pm with an activity to motivate the students to participate in the session. Our highly qualified expert took an online session on the topic and mentioned the tips and strategies to upgrade communication skills. After the session, we conducted a questionnaire round and asked a few questions to the students. Most of the **students** answered the questions correctly, which reflected their engagement in their sessions.

One of the **senior members of management** says," At SSSI [Online Tutoring Service](http://Issuewire.com), we ensure to provide education that can help the students in upgrading their **professional skills**. Also, exploring the world around them and assisting them in achieving their career objectives so that they can turn into efficient leaders of tomorrow. With the help of monthly **NGO visits**, our motive is to provide **education to every child** irrespective of caste, creed, or religion. Moreover, through our project "**Teach India Movement**", we ensure to elevate the development of mankind through cognitive refinement of the students from unprivileged sections of society by assisting them to communicate, connect and learn with

the **best online educators.**"

One of the senior members of **Udaar Foundation** said, "We were looking for the opportunity to help the students enhance their oral skills. It was amazing to see how the students connected with the executives and developed their understanding concerning their **communication skills**. The best part of the session is that the executives employ both **audio** and **visual** modes to conduct the sessions. Also, several activities were conducted to boost the morale of the students. Students were **enthusiastic** about participating in more such sessions in the future."

This is not the end: we are looking forward to connecting with several **NGOs** and working upon our **mission education** to provide education to the student community from underprivileged sections. By conducting online and offline sessions on **social welfare topics** through the monthly NGO visits.
