

Alfonso Hilsaca Eljadue's AGM Desarrollos, Call to Action in Bolivar

In Palenque, Bolivar Colombia South America, Alfonso Hilsaca Eljadue's AGM Desarrollos is a true shining star.

Cartagena, Bolivar Mar 13, 2022 ([Issuewire.com](https://www.issuewire.com)) - The health counselor of the Board of Directors of the Community Council of Palenque, Alba Luz Herrera Julio, wasn't vague about the depth of gratitude the people of the community felt for the generosity of Alfonso Hilsaca Eljadue's AGM Desarrollos during the worst of the Covid19 pandemic.

As a measure to mitigate the impact of the pandemic, the National Government placed significant restrictions on interactions and travel which greatly affected commerce in a negative way. Many Colombians were impacted by the pandemic, causing a crisis for so many.

In this dire moment of history, Colombians in the Bolivar region have been assisted recently in a display of great kindness and generosity of private and coordinated donations. Many corporations all over the world donate to charities. In many countries, it is a large part of the corporate structure.

It is wonderful that companies donate funds for relief, however, examples recently in Colombia exceed mere donation. The Alfonso Hilsaca Eljadue company AGM Desarrollos, through its AGM Huellas de Piedra Foundation, has taken donations to another level and is getting noticed worldwide. AGM Desarrollos provides substantial fiscal donation, but even more, they are active in all aspects of assistance. Rallying other corporations and private businesses to work together. Gathering expertise to develop the most productive assistance, determining what to invest in, how to arrange the best value in purchasing goods associated with the donations, and how to invest in systems that can build upon themselves and help the community in perpetuity.

It is obvious that AGM Desarrollos desires much more than generous fiscal donations on its records. The AGM Huellas de Piedra Foundation is driven to increase the value and efficiency of donation and eliminate corruption and wasteful spending. Not only investing in the people, but investing time and effort into the system that is designed to provide assistance in times of need. Resulting in improved charity efforts and results, making a real improvement in the systemic lives of the citizens.

Other companies assisting in the logistics of donation, Transport Company of Turbaco and the Transit Consortium of Clemency, supporting the management of the Transit Secretariats of the municipalities. More than 4,000 packages were delivered in the rural area of Cartagena and municipalities of the department. Other we are scheduled to continue doing our bit in other towns in the department of Bolivar, such as San Juan, San Jacinto, El Guamo, among others.

In Rafi Valle, the mayor of San Estanislao de Kotska expressed great gratitude for the effort and praised its success. Calling it a true blessing at a time when conditions were the most challenging.
