

# All Excellent Apps announces launch of GPS Angular Camera for field members to take photos in tracking project

Add DateTime, Location, Pitch angle, Azimuth and Altitude to Photo with Anglecarn

**Surat, Gujarat Mar 30, 2022 ([Issuewire.com](http://Issuewire.com))** - All Excellent app is honored to announce the launch of a new application "GPS Angular Camera" which is an app that allows teams and virtual groups to increase the visibility of a project that helps to make more informed decisions along the way. Field Photos and videos are important to capture to make sure the project's progress when one is physically not present. Instead of purifying grimy project notes quickly review uploaded project photos to make sure the project task is finished systematically.

The GPS Angular Camera app for field photography was designed for ease of use and rapid deployment of team projects to build the most essential aspects of field reporting and field tracking through photographs. This app opens the door to small and medium-sized businesses (SMBs) to build stronger team safety protocols and maintain high-quality work. This can eventually, save field crew time, too--- all they have to do is snap a few shots with this app and detail it with location and important notes to distinguish certain project factors.

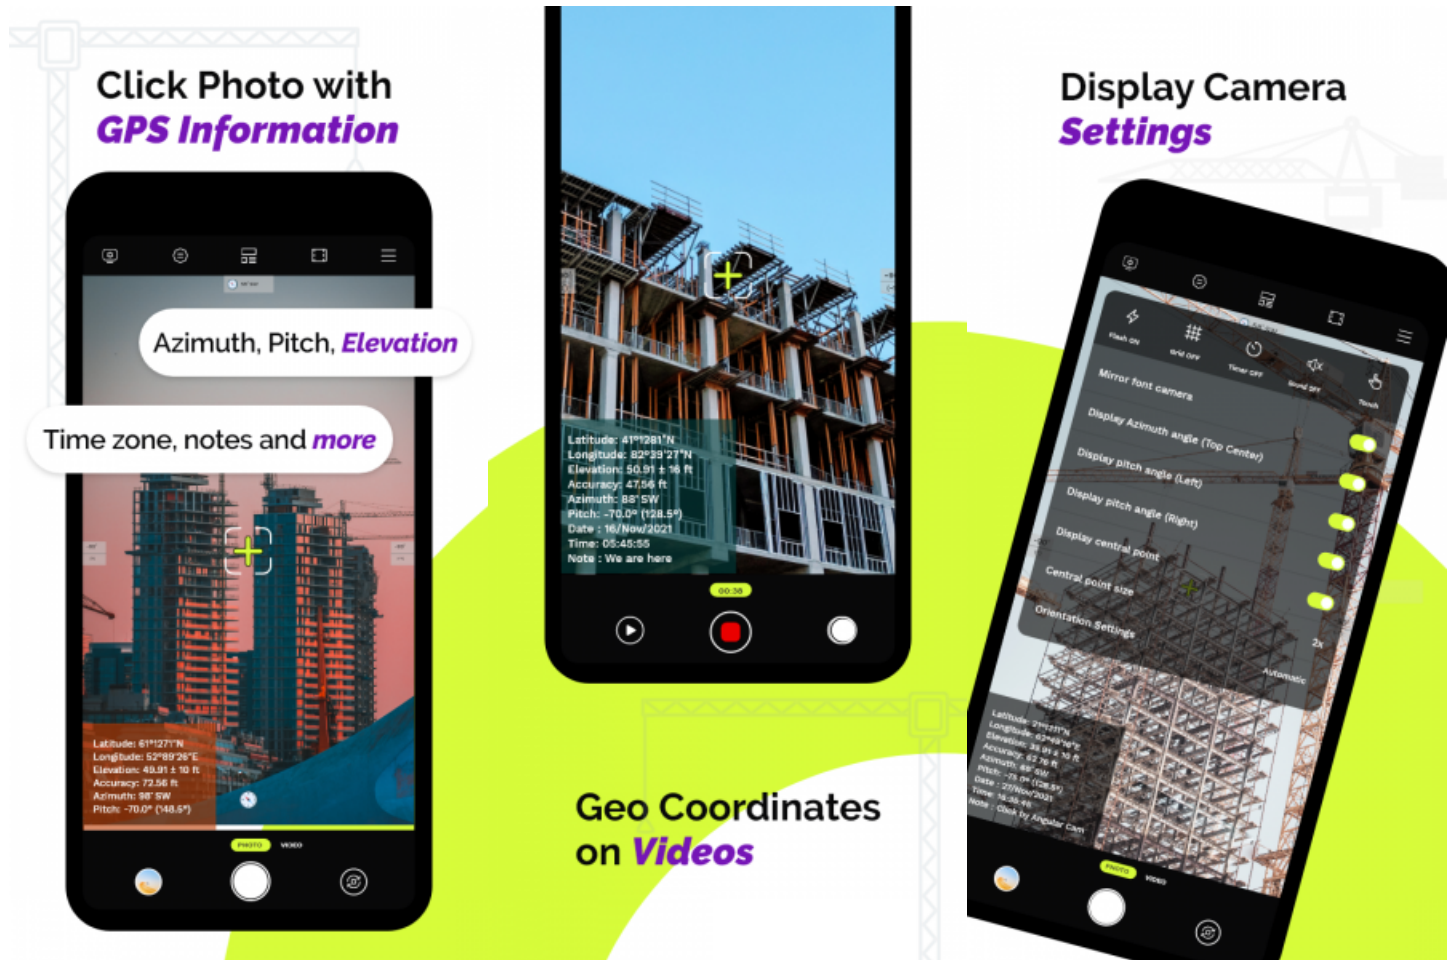

As this is the leading provider of trusted tools to start, grow, and manage a retail business of any size, All Excellent apps make photography better for everyone with a platform and services that are engineered for reliability while delivering a better working experience for users everywhere.

The CEO and founder of All Excellent apps said that putting a detailed photo record can eventually have valuable peace of mind that make sure you can document everything on your project and back up your side of the story to avoid costly penalties.

The image speaks louder than words, so make sure to reflect out with location site management details

to further preventing in the involvement of legal dispute claims. An industry-specific tool, like GPS Angular Camera, for example, could help you build that single source of truth that you need.
