

appCURE is Trusted to Enhance Citrix® Desktop Virtualization Solutions

London, United Kingdom Mar 31, 2022 ([IssueWire.com](https://www.issuewire.com)) - appCURE today announced that its [appCURE Capture and Packager](#) has been verified as Citrix Ready™. The [Citrix Ready program](#) helps customers identify third-party solutions that are recommended to enhance DaaS and VDI, App Delivery and Security, and Content Collaboration and Work Management solutions from Citrix Systems, Inc. appCURE completed a rigorous verification process to ensure compatibility with Citrix Virtual Apps and Desktops service™ and Citrix Virtual Apps and Desktops on Azure, providing confidence in joint solution compatibility.

The Citrix Ready program makes it easy for customers to identify complementary products and solutions that can enhance Citrix environments. Customers can be confident that appCURE has successfully passed a series of validation criteria established by Citrix, and can be trusted to work effectively with Citrix Virtual Apps and desktops in order to get to production with applications faster.

appCURE is based around the CURE (Capture, Update, Remediate & Execute) were problems around moving applications to delivery at a pace that fundamentally shifts the time to production of Citrix environments.

“As a member of the Citrix Ready program, we are able to offer customers intelligent solutions that combine appCURE Capture and Packager with Citrix Virtual Apps and Desktops service,” said Ryan Mangan – CTO of appCURE. “The offering demonstrates our plans to work closely with trusted partners, through the Citrix Ready partner ecosystem, in order to provide the highest quality experience for our customers.”
