

Boost Value Of Your Crypto Currency With Intrinsic Utility Developed By Dollarstore

Irvine, California Mar 8, 2022 ([Issuewire.com](https://www.issuewire.com)) - DollarStore has created a novel utilization for Crypto Currency, where the currency is not just a mean for the transfer of value or store of value but exchanging currency for items of value.

Their mission is to create a reward and Loyalty Platform that will permeate the CryptoCurrency Marketplace and connect them with their customers by virtue of utilizing their tokens thus potentially increasing the value of the token.

Partnership with DollarStore

Established in 1996, DollarStore.com is one of the world's largest and most complete online sources of general merchandise for the Retail and Wholesale industry both in the US and Globally.

[Dollarstore.com](https://dollarstore.com) is offering an online shopping platform in the USA for fast-moving consumable goods (FMCG) that allows the use of any Digital Currency or Token to create their own storefront for example XRP.DollarStore.com or ABBC.DollarStore.com, where their Currency is the mode of transaction for buying consumables.

Reward and Loyalty Platform

DollarStore has created a Reward and Loyalty platform that will allow their store owners to connect with their customers by using Reward and Loyalty Points (tied to their Crypto Currency). Shoppers receive their rewards in tokens for their purchases which can be redeemed or cashed out. There could be

significant Community benefits when the ecosystem grows.

DollarStore Ownership

Owning a [Dollarstore.com](https://dollarstore.com) e-commerce store has a myriad of benefits. Store owners can acquire a license that provides a Stand-Alone Sustainable business with Lifetime Ownership, Custom Domain, Secure Hosting, Complete Order Fulfillment, Merchant Payment Gateway, SEO Keyword Optimization, CryptoCurrency Utilization, Marketing Support, and much more. A value builder asset that can be sold, transferred, gifted, or left in legacy.

Widen boundaries

When consumers use Crypto Currency to buy products in online Dollar Stores, Sales Volume and transactions are automatically added to the Blockchain. This potentially may cause the currency value to go up organically. Each transaction using digital currency is recorded on the blockchain which could provide greater transparency as well as intrinsic validity of the token or currency used.

Conclusion

DollarStore is looking to lead the mass adoption of CryptoCurrency by Millions of consumers around the world. [DollarStore](https://dollarstore.com) founder Rex Mehta believes that e-Commerce is the only way to make virtual currency's original promise: an instant, affordable, and borderless means of payment for consumers and business owners alike.
