Los Angeles, California Mar 28, 2022 ([IssueWire.com](https://www.issuewire.com)) - “ **Press Release:** *Bristol Healthcare Services, a premier medical billing, and coding company located in Los Angeles, California, is pleased to announce the launch of its latest proprietary software **Bristol Bot®** “*

Introducing Bristol Bot®

At Bristol Healthcare Services, we are excited to announce the launch of our latest proprietary software - [Bristol Bot®](#), a one-stop, cost-effective solution for simplifying and speeding up the eligibility verification and claim status checking process for healthcare providers. Utilizing Bristol Bot®, providers can now save on average 70% of their expenses on eligibility verification and claim status checking. It provides a faster and more efficient way to get reimbursed for services rendered.

Bristol Bot® boasts end-to-end encryption and state-of-the-art security, ensuring patient-data confidentiality. Our data centers are SSAE-16 SOC-1, SOC-2 certified as well as HIPAA, HITECH, PCI-Level 1 DSS, NIST 800-53 compliant.

The Bristol Bot® Advantage

- **Multi-Network Connectivity:** With over 900+ insurance providers signed up to our network, fetching and verifying patient insurance information is made effortless, efficient, and expeditious.
- **Effortless Log-in:** Verify insurance coverage with one username and password. No more calling, holding the line, faxing, or maintaining multiple users accounts for various payers.
- **Batch Uploads:** Say goodbye to single uploads. Now check coverage details of multiple patients in one go. Download your patient list and upload it to Bristol Bot to get the results in just a few seconds
- **Real-Time Verification:** Patients shouldn't have to wait while your front desk personnel verifies medical coverage benefits. You can get coverage details – active, inactive, specific benefits, and more in just 3-5 seconds.
- **Hassle-Free Claim Status Check:** We've tied-up over 900+ insurance carriers to enable quick and instant claim status checking. With the new 'batch-mode' users can now check the status of multiple claims in one go. Also, our claim status trend assists you with root cause analysis for the prevention of future denials.
- **Security & Safety:** The safety and security of your practice and patient data (PHI) are of the highest importance. Bristol Bot® data centers are SSAE-16 SOC-1, SOC-2 certified as well as HIPAA HITECH, PCI-Level 1 DSS, NIST 800-53 compliant.
- **No Installation/Maintenance:** Bristol Bot® requires no installation or maintenance overhead – plus, you always use the latest version of the software.
- **Multi-Device Support & User-Friendly:** Bristol Bot® enables users to access the software from any device - desktop or laptop. The interface is easy-to-use, with information displayed in a clear and easy-to-understand format.

- **Enhanced Patient-Care:** As a practice grows, administrative work eats into time spent on quality patient care. Bristol Bot® assists in automating administrative processes so you can focus on what you do best - healthcare.
- **Lowered Expenses:** Bristol Bot® assists providers in simplifying the eligibility verification and claim-status checking process, helping you save an average of 70% on out-of-pocket expenses.

Bristol Bot® Workflow Process

- Contact the payers to get the API details for integration.
- Log into Bristol Bot® using the provided credentials.
- Choose what you wish verify, eligibility, or claim status.
- Select single or batch upload format based on the requirement.
- Update the details and submit for a single claim or upload the file with filled data and submit.
- Get results in a few seconds for a single claim, and for multiple claims it depends on how many claims we have uploaded and the insurance used.

Expertise You Can Trust

At [Bristol Healthcare Services](#) we take great pride in providing award-winning medical billing and coding services at an affordable price to practices across the country for over 25 years. Our team of certified and experienced billers and coders; equipped with state-of-the-art technology, specializes in maximizing profitability for over 35+ specialty-based practices.
