

Cloud-in-Hand® Solutions Platform – USA-Based Mobile Tracking Solutions

A check-in app to track and manage people data without pen and paper.

Cloud-in-Hand® Solutions Platform

Cedar Park, Texas Mar 3, 2022 ([IssueWire.com](https://www.issuewire.com)) - Workplaces often face emergencies and chaotic situations no matter how many safety training programs employees undergo. There is always something that is bound to go wrong in a way. As counter measurements, businesses implement several safety protocols and procedures to ensure employees' safety at the workplace. USA-Based [Cloud-in-Hand® Solutions Platform](#) brings Mobile Tracking Solutions utilizing the latest in RFID, NFC, and barcode

technology to ease all the safety and tracking-related concerns associated with any business organization.

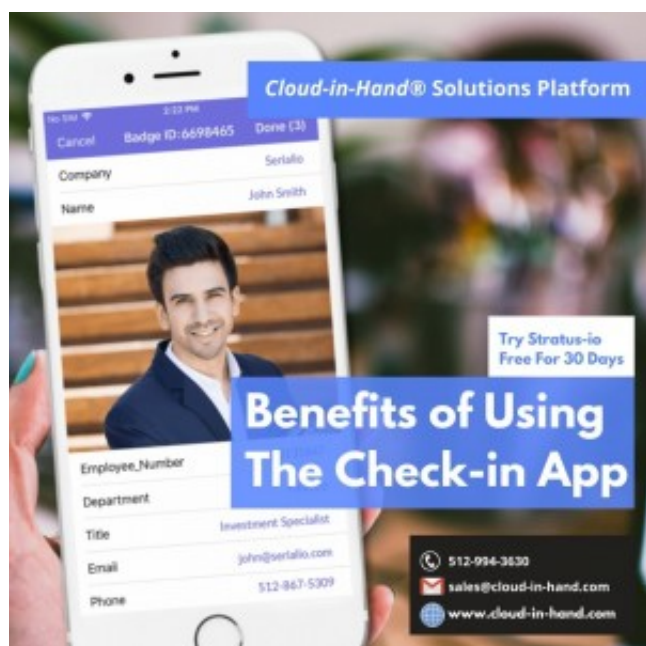

Words from the MD, "The Cloud-In-Hand® Mobile tracking solutions allow organizations to determine using an automated system which individuals have safely arrived at assembly or event areas – and which people remained unaccounted for. We have developed our tracking solutions to be mobile. So it allows us to make your experience with the workflow even easier at any place, anytime. Our solutions have always been device/platform agnostic; we provide workability with every device, including mobile-based platforms to desktop devices.

It allows your organization to extend the functionality of the implemented tracking solution during the process. Also, attendance summaries recorded with the Cloud-In-Hand® solutions can be synchronized with your pre-existing back-end databases or servers such as FTP, SQL, Dropbox, Google Drive, and Amazon S3. It also allows you to receive your reports directly through Email."

Words from the Marketing Team, "To provide optimal security with our tracking solutions, we at Cloud-In-Hand® private cloud services provide clients with a distinct and secure cloud-based environment in which only the specified user is authenticated for access. Our app solutions security can even be enhanced as you can provide certain individuals with different levels of accessibility."

About Cloud-in-Hand®

Cloud-in-Hand® is a [mobile tracking solutions](#) provider company that allows business organizations with apps that will enable them to track and record check-ins for daily attendance, meeting sign-in, events, and more. Track scans on the go or from kiosks with a check-in app that works anywhere with or without network availability with **Cloud-in-Hand®** mobile tracking solutions.
