COVID-19 pandemic has made it difficult for people worldwide to enjoy special occasions like Birthdays and Marriage ceremonies. Most people have been affected by the strict policies to stop the spread of the deadly virus.

Gifts are synonymous with special events, and buying gifts online has proven a great way for people to express their feelings for their loved ones. Ecommerce stores like GiftLab that provide customized gifts have made it easier for people to stay connected.

Statistics show that people have relied more on ecommerce during the pandemic, and the online gifts industry has also seen an increase. The market of personalized gifts worldwide can grow by USD 7.37 by the end of 2024, according to the Technavio report.

Personalized gifts have a more emotional attachment for customers. Compared to the easily available gifts at brick-and-mortar stores, customized gifts can show how much the sender knows about the recipient of the gift.
