

DJ Krav (Karanvir Pukhwal) he told about to launch his first Music NFT

Musician / DJ Producer

Wardha, Maharashtra Mar 27, 2022 ([Issuewire.com](https://www.issuewire.com)) - Music is a form of art that has been in existence for decades. Every year, there are a number of new artists who come into the field and create an amazing impression on their listeners. In recent times, these musicians have adopted the use of technologies to bring their art to life in new ways. One such example is the launch of music NFTs by DJ Krav (Karanvir Pukhwal).

An NFT is a "non-fungible token" that can be bought and sold on cryptocurrency exchanges just like any other digital asset. The tokens represent collectibles and they come with embedded metadata that can't be altered. The tokens are also made available through digital wallets on smartphones, tablets, or computers. This music NFT does not only allow you to own.

—

The music industry has always been a large focus on Opensea and a major contributor to the company's growth. Opensea is a music retailer that sells NFT, vinyl, and digital artwork to consumers all around the world. What makes them so different from other retailers is that they also sell limited edition artwork called nftart which are pulled from popular artists and genres.

NFTs are products of limited supply with an individually numbered certificate that guarantees that you own it, making it a perfect way for reselling or trading with other collectors for their favorite records. The best feature about NFTs is their portability as you can take your newfound treasures anywhere in the world without worrying about importation or duty fees.
