

EINR COIN is Supported with the Private Office of His Highness Sheikh Hamdan Bin Ahmed Al Maktoum.

EINR is Backed-up & Supported vide an MoU with the Private Office of his Highness Sheikh Hamdan Bin Ahmed Al Maktoum

Middletown, Delaware Apr 7, 2022 (Issuewire.com) - As we know that crypto-currency has taken over the world. The traditional banking system has its own advantages and disadvantages. The advantage is that your money is safe and the main disadvantage is the delays in payment processing and various hurdles in fast payment transfers.

When you talk about international transfers, it takes days to conclude such a transaction. Therefore we have come up with a simple platform where people can participate in cryptocurrency trading and also shield themselves from the uncertainty/volatility of the cryptocurrency market.

We have come up with a stable coin EINR which will be a stable coin, having a value equal to INR (Indian Rupee).

The vision behind starting the EINR as a new currency token is that we want to serve finance and all sectors of industry with this Token. People who are holding EINR currency can pay anywhere in the world using this currency. Similarly, we believe that this currency will enable the transaction in the Other Sectors industry where low-level workers may not have regular bank accounts available to them.

EINR is Backed-up & Supported vide an MoU with the Private Office of His Highness Sheikh Hamdan Bin Ahmed Al Maktoum
