Let's begin!

Some of the reasons behind Epson printer is not responding are here:

The print command is not selected properly.

The connection between your printer and computer has been interrupted.

The cable between your computer and the wireless connection is damaged or disconnected.

There may be some issue with your Epson printer's driver, which can prevent it from printing or responding.

How can I fix the Epson Printer that is Not Responding?

Inspect Before you connect

The most comfortable and first procedure is to check the connections of the printer. If you are using a wired printer then check the power cable. Confirm it is tightly attached at both ends or if you are using a wireless printer, make sure the Epson printer is connected to the Wi-Fi.

The 2nd Method is to Disable the firewall

Antivirus is an integral program required to protect your device. However, at times, they may be the cause behind not responding issue. For that, try to disable the firewall and examine if the printer begins functioning. If yes, then the antivirus is the issue.

Set Your Printer as default printer

- Make sure that your computer is powered on.
- Now enter Default Printer in the search option.
- Next, you will have to select "Let Windows manage my default printer."
- Disable the Let Windows manage my default printer.
- Visit the Devices and Printers section and right-tap on your Epson printer.
- Select Set as Default Printer in the list.
- Confirm a green tick adjacent to the printer

Run Epson printer troubleshooting

- Epson printer troubleshooting can be done using this console.
- In the settings window, choose Update and Security.
- Click troubleshooter.
- Execute the onscreen commands

Fix print spooler

- Open the run function
- Enter services.msc and press the enter key
- In the services tab, double-tap print spooler
- In the properties window, select Startup type as Automatic
- Open the C: Drive and choose Windows
- Delete all the files
- Thereafter restart the spooler service

So in this post, we have discussed some very important steps to troubleshoot the **Epson printer that is not responding issue**.
