Arvada, Colorado Mar 9, 2022 ([Issuewire.com](https://www.issuewire.com)) - Hidden Lake Technology, (HIDDENLAKE) a leading Cloud Computing Integration firm, is pleased to announce that they have been awarded GSA-MAS (Multiple Award Schedule) Contract (47QTCA22D002A), and are now certified to supply commercial goods & services to the Federal Government. Acknowledging the growth in federal spending through the GSA, Hidden Lake Technology have listed their Cloud Professional and Managed Services for big data and analytics, migration services, application and database refactoring, and their advanced cloud security services on the government's electronic ordering system, GSA Advantage!®.

"This contract opens up significantly more markets throughout the country and affords us an opportunity to continue to provide all Federal branches access to our integrated-turnkey cloud migration technology," states Grant Hamilton, Managing Partner at Hidden Lake Technology. He adds: *"Customers are grappling with the demands of big data, cloud-migration, complex application refactoring as well as increased security compliance; our goal is to exceed their expectations by guiding them through the ever-changing landscape of information technology."*

An Advanced AWS Consulting Partner with Education Competency, Hidden Lake Technology offers four signature services: Education, Government Cloud Integration, Complete Migration Services, and Enhanced Security Services. Hidden Lake Technology's understanding of higher education and its unique needs help both the institution and the student focus on what's really important; research will no longer wait for the hardware procurement cycle or be subject to the whims of a server's age or performance capabilities, they are always on, always available, and additional hardware is just a cloud migration away. Hidden Lake's Government Cloud Platform offers security requirements built on past expertise and experience. Our technology focuses on engineering capabilities first – keeping costs low, guaranteeing government customers are getting maximum value and ensuring responsible use of taxpayer dollars.

About Hidden Lake Technology: Founded in 2008, in Arvada, CO, Hidden Lake Technology works with customers and their partner networks to improve technology use across government and corporate America. HLT's expertise stretches across the cloud, virtualization, system security, and data protection and recovery. Hidden Lake's projects range from short term consultations to complex, multi-year deliveries involving innovative solutions, multiple parties, and strict deadlines.
