

Kuche7 proclaims the epitome of Eco-friendly Kitchens with Stainless Steel.

With the advent of creative graphical representation, Kuche7 takes a firm stand against the traditional wooden kitchens.

Mumbai, Maharashtra Apr 1, 2022 ([Issuewire.com](https://www.issuewire.com)) - The creative marketing

Recently, [Kuche7](https://www.kuche7.com) depicted a strong empathetic creative across all its social handles. While some may find it to be disturbing, it is a valid representation of the dark side of wooden kitchens. The graphic

portrays the slaughter of a tree trunk along with animal butchery. It aims to instigate a strong feeling in the mind of the viewers and educate them about the harsh reality of wooden furniture. The tagline, **'When the wood dies, so does the wildlife,'** makes the viewer rethink their decision on wooden furniture and urges them to look out for greener and [eco-friendly alternatives](#), such as **Stainless Steel**.

Every individual is morally obliged to turn to greener and nature-friendly alternatives due to the alarming rise in deforestation. To save the planet from the extinction of green life, everyone must switch to comprehensive solutions of Stainless Steel. A decrease in tree life also results in a reduction of wildlife. **Fewer the trees; fewer shall be the livelihood of animals.** India is already witnessing an excruciating decline in its wildlife due to global warming. The least humans can do to save them is to retain their natural habitat by using the stainless steel kitchens by Kuche7.

Introduction to Kuche7.

Kuche7 holds the crest of being among India's first companies to pioneer comprehensive [stainless steel modular interior solutions](#). With an increasing number of homeowners opting for environmentally friendly options for their modern homes, Kuche7's stainless steel modular kitchens have emerged as a popular choice in the Kitchen Industry.

Kuche7 firmly believes in preserving Nature and challenges the traditional wooden kitchens with their eco-friendliness. It aspires to elevate the everyday kitchen experience into an eco-friendly stainless steel experience. With advanced R&D acceleration, Kuche7 creates an ideal link between Nature and Modernity.

The advent of Eco-friendly Kitchens.

Stainless Steel is an alloy of Iron & Chromium. It is not a naturally derived material like wood but rather a manufactured material formed by melting its parent metals at high temperatures. Every year more than 12 billion trees are cut down to produce wooden furniture. This greatly contributes to the decrease in forest life. To curb this burden, Kuche7 initiated the production of Stainless Steel modular kitchens for residential use. Unlike the wooden kitchens, they do not require any sacrifice from Mother Earth.

Stainless Steel has been widely used for high-end commercial kitchens worldwide because of its lack of maintenance and durability. Being a blend of the two strongest metals makes it the strongest kitchen material on Earth. The durability of any material is directly interlinked to its strength. **Stronger the base material, durable shall be its by-products.**

Kuche7 aims to utilize the strength and durability of Stainless Steel and produce a long-lasting kitchen experience for every Indian homeowner. A greener and cleaner solution to every Indian kitchen problem. The green philosophy of giving back to Mother Earth by creating eco-safe solutions is the driving principle behind Kuche7 eco-friendly kitchens.

Nature with Modernity.

The [Sustainability of Stainless Steel](#) enables the designers to widen the design horizon. It can be formed and reformed without losing its core characteristics. Excessive use, harsh weather, humidity, and other factors have no bearing on Stainless Steel's strength, durability, or environmental friendliness. To further win the hearts of home-makers, Kuche7 provides a lifetime warranty on every Kuche7 purchase. A one-time purchase of the Kuche7 kitchen shall be your lifetime investment.

While Kuche7 contributes to creating eco-friendly solutions for Indian homes, its expert designers run high-end design research to perfectly blend Nature with modern design principles. Recently, Kuche7 achieved the highest level of innovation by introducing a Curve kitchen at their Andheri experience center.

[The Sustainable Factor](#)

The mantra of three 'R' rightly suits the silhouette of Kuche7 Stainless Steel Modular Kitchens.

- REUSE

Every modular can be reused multiple times as they are portable. You can transport your modular kitchen to your desired location without any worries. As it is a factory-built product, it is made with absolute precision without any misalignment.

- REDUCE

Kuche7 pays special attention to reducing the stress on Nature. Therefore, Kuche7 takes pride in becoming the first few companies with the lowest carbon footprint.

- RECYCLE

With Kuche7 Stainless Steel modular kitchens, you can enjoy the same kitchen for a lifetime. Every few years, you can change the outlook without changing the entire kitchen layout and module.

The Hygienic Kitchens.

Kuche7 specializes in new-age modular kitchens made up of 304-Food grade stainless steel. This grade, in particular, is rust-free, termite-free, has anti-micro bacterial properties, and is long-lasting. It also requires less care and is simple to clean and all of these [advantages](#).

Along with being long-lasting, stainless steel modular kitchens are also environmentally beneficial. It eradicates the chance of insect invasion while also ensuring a high level of cleanliness.

The growth of the home interiors industry-led [Kuche7](#) to develop new strategies for making physical showrooms accessible to savvy consumers. Instead of depending on virtual brochures and videos, customers can now get a firsthand experience with a potential purchase.

Moreover, it is super easy to connect with the expert designers of [Kuche7](#). With just a click, you can book a visit to your nearest experience center. You can also have them at your place by opting for a home visit.
