

Leawo Updates Music Recorder for Mac 3.0.5 with Apple M1 Chip Support

Leawo Software today officially released Music Recorder for Mac 3.0.5, updated with Apple M1 chip support and bug fixes.

Shenzhen, Guangdong Mar 4, 2022 ([Issuewire.com](https://www.issuewire.com)) - Apple's latest Macs don't come with Intel processors. Instead, they feature the brand new Apple M1 chip, a powerful replacement that offers many improvements in computing performance, graphics output, and battery life. Unlike Intel chips built on the x86 architecture, the Apple M1 chip adopts an ARM-based architecture, which is more similar to the A-series chips Apple has been designing for iPhones and iPads over the years. While the M1 chip delivers faster single-core performance, there may still be compatibility issues running x86 apps on ARM-based chips. To improve the user experience on Macs with M1 chips, Leawo Software, a company specialized in multimedia solutions and data management software, today officially launched [Music Recorder for Mac](#) 3.0.5, updated with Apple M1 chip support and bug fixes.

With the springing up of subscription-based streaming services, downloading music seems more and more tricky, which gave rise to Leawo Music Recorder for Mac. This software is designed to record music from any source, including external input audio, computer system audio, and even online music sources like [YouTube](#), [Tubidy](#), [Tidal](#), and other 1000+ sites. All recordings will be added music tags intelligently and saved in MP3, M4A, or WAV format without quality loss. Thanks to innovative Auto Ads Filter, Auto Track Splitter, Audio Parameter Adjuster, Task Scheduler, and Music Tag Editor, users can

easily record and customize their recordings at will. Furthermore, all recorded music can be shared to iTunes in one-click for further listening. With the latest update, Leawo Music Recorder for Mac 3.0.5 brings the following improvements:

- **Compatible with Apple M1 chip** – improve the performance and stability of Leawo Music Recorder for Mac on Macs with Apple M1 chip.
- **Audio plugin update** – the original audio plugin is replaced by LeawoAVAudio.
- **Copyright license upgrade** – copyright license upgraded to 2022 for safe and legal recording.
- **Bug fixes** – more than 13 bugs were fixed for a better recording experience.

Price & Availability

Starting today, Leawo Music Recorder for Mac 3.0.5 is available on macOS Monterey (12), macOS Big Sur (11), macOS Catalina (10.15), macOS Mojave (10.14), macOS High Sierra (10.13), macOS Sierra (10.12), OS X EL Capitan (10.11), or OS X Yosemite (10.10), as well as Macs with Apple silicon, including MacBook Pro (14-inch, 2021), MacBook Pro (16-inch, 2021), iMac (24-inch, M1, 2021), Mac mini (M1, 2020), MacBook Air (M1, 2020) and MacBook Pro (13-inch, M1, 2020). Pricing at \$19.99 and \$29.99 respectively, one-year and lifetime licenses for the premium version of Leawo Music Recorder for Mac 3.0.5 are also available for purchase today on its official website. Plus, to celebrate the upcoming spring, Leawo specially launches their [2022 Spring Giveaway & Specials online sale](#), providing up to 60% off Leawo Music Recorder for Mac and iTunes Video Converter freebie.
