

Orion Communications Announces Award of GSA MAS Contract

Dallas, Texas Mar 14, 2022 ([Issuewire.com](https://www.issuewire.com)) - Orion Communications, Inc. ([ORION](https://www.orioncommunications.com)) a women-owned business and leader in Operational Workforce Management Software for Public Safety, is pleased to announce that it has been awarded a Multiple Award Schedule (MAS) contracting vehicle by the General Services Administration (GSA), the focused procurement wing of the federal government. Being awarded this GSA contract differentiates Orion as a top provider of highly configurable, cloud-based software that simplifies the complexities of managing mission-critical government personnel.

Using Orion's GSA MAS Contract ([47QTCA22D0032](https://www.gsa.gov/procurement/contract/47QTCA22D0032)) government agencies will now have the ability to obtain Orion's IT Software and Services under three Special Item Numbers (SINs): 511210 (IT Software Licenses), 54151S (IT Professional Services), and 518510C (Cloud and Cloud-Related IT Professional Services) using the government's electronic ordering system, [GSA Advantage!](https://www.gsaadvantage.com)®. Orion's MAS contract is government-wide, granting Orion an awarded period of five years, with three additional five-year option periods to follow, totaling a potential 20-year contract life.

"We've served the state and local public safety workforce for over two decades by listening to our customers and designing software based on their needs," states Orion President, Leslie DeLatte. "We understand the complexities they face and the expectations surrounding their performance. We're honored to have been awarded this GSA contract as a vehicle to provide our solutions directly to the federal workforce or indirectly as a minority subcontractor to GSA primes.

Orion specializes in software systems for government agencies with complex business rules. The software portfolio includes a suite of centralized administrative and operational management tools with comprehensive integrations, dynamic security policies, and the value-added ability to use workforce data to generate analytical visualizations for data-driven insights.

About Orion Communications, Inc.

Founded in 1998, Orion is an operational workforce management software provider that has been simplifying complex personnel management, scheduling, equipment, training, and timekeeping processes for public safety agencies nationwide for over 20 years. Orion's public safety software and services enable organizations to increase workforce efficiencies, reduce costs, and ensure that regulatory compliances are achieved. Orion is a certified small business and women-owned business

headquartered in Dallas, Texas. Visit www.orioncom.com for more information.
