

# PiControl Solutions LLC: Pioneers in Model Predictive Control Technology!

PiControl Solution LLC Saves Customers' Time, Money, and Headaches Through MPC Technology!

**Houston, Texas Mar 3, 2022 ([Issuewire.com](https://www.issuewire.com))** - As a pioneer in model predictive control technology, PiControl Solutions LLC accommodates model predictive controllers (MPCs) that are some of the most advanced and sophisticated in the world. MPCs at PiControl Solutions LLC can help you optimize your systems to achieve superior performance and efficiency. At PiControl Solutions LLC, you can choose from a wide range of applications including process control, energy management, and machine learning. The team of experts is dedicated to providing you with the best possible service and support. Conveniently, you can improve your [model predictive controller](#) (MPC) performance with PiControl Solutions LLC's customized software and technology.

PiControl's software, which is also known as COLUMBO, is a closed-loop universal multivariable optimizer that can be used to improve any MPC, such as DMC or RMPCT, without sacrificing system security by reading Excel files containing MV & CV data from the control unit with its proprietary algorithms which allow it to generate optimized commands for improved accuracy in corners. The company offers remote maintenance consulting for any MPC, including DMCs or RMPCTs!

The team at Picontrol Solutions LLC is capable enough to make sure that you never face a problem again when it comes time for repairs on an existing system and help determine what new technologies would be best suited to provide maximum efficiency during design phases. Possessing access both locally AND globally means no matter where users are located worldwide - they'll always have fast response times from support specialists waiting around 24/7.

Picontrol Solutions LLC is always looking for new ways to improve products and services, and it is committed to providing you with the best possible value. If you are interested in learning more about model predictive control or how Pi Control Solutions can help you optimize your system, please get in touch with us today. The customer support team at PiControl Solutions LLC would be happy to answer any questions you may have.

Please visit the official website of Pi Control Solution <https://www.picontrolsolutions.com/> for more information.

### **About PiControl Solutions**

Picontrol Solutions LLC is a software company that develops and sells technology for industrial process control. PiControl has been providing solutions to customers since 2000, emphasizing PID loop tuning, multivariable closed-and-open-loop identification (transfer function parameter models), MPC identification and maintenance, real-time PID/APC control quality monitoring (CLPM – control loop performance monitoring), and LIMS/LMS integration. With its portfolio of products tailored to the needs of today's industry leaders in process automation, PiControl continues to provide robust solutions for large multinational corporations around the globe.
