

Project Pixxel Charity Livestream for Ukraine

Gamers are raising money for Ukrainian forces on the ground

London, United Kingdom Mar 3, 2022 ([Issuewire.com](https://www.issuewire.com)) - Pixxel Studios are a group of friends who are mostly university students, building an MMORPG and Social Platform hybrid. They started out by playing games together before deciding to get together and build their own. They are a collaboration of artists, coders, and musicians who want to build something for themselves.

With the terrible situation going on in Ukraine right now and one of their members being a Canadian who

has family in Ukraine at this very moment, they have banded together and have decided to do a live stream on their twitch channel to raise money for a Kyiv based charity which supplies ground forces and civilians. <https://savelife.in.ua/en/donate/>

The games some will be playing are Ukrainian developed games.

"We are just a group of gamers, and sadly we cannot go to Ukraine and fight on the ground and help these brave people defend their homeland but we can help in the only way we know how. By gaming."

- Benjamin W

"We have redeveloped our stream overlays and our mascot to support Ukraine and represent the colours of this brave nation." - Sam

You can watch their live stream on **twitch.tv/pixxelstudios** on **Saturday 5th March** at **4 pm GMT** through to **Sunday 6th March**.

Please show your support. Gamers Unite!
