

PTC Farms Sets Long Awaited Opening Date

Bantayan, Cebu Mar 16, 2022 (IssueWire.com) - A new fresh face on the beautiful Bantayan Islands' commercial business/tourist attraction skyline is set to launch on April 8th. Located in Barangay Puti-an Bantayan, by its very nature, PTC Farms immediately claims the top spot as the most unique 'must see' destination to be added to the island's attractions in recent memory. This peaceful serene 2-hectare farm is situated on one of the most beautiful naturally landscaped properties on the island and has a lot to offer the 'beach and bar' weary traveler seeking something unique, different, and memorable.

From a farming aspect, PTC Farms is the first and only commercial-scale 100% organic producer of the truly amazing superfood called "Dragon Fruit". The fruits' nutritionally rich content and health benefits combined with its super-sweet taste are rapidly driving worldwide attention, popularity, and demand, and with expansions plans rolling out, PTC Farms is on course to become one of the largest producers in the province of Cebu. The farm also grows mango, pineapple, guava, grapes, and Peruvian apple cactus on a non-commercial basis, all of which lend in complimenting a visitors' farm experience.

But there is much more to PTC Farms than fruit cultivation. After taking an educational guided tour of the farm property and areas under dragon fruit production, visitors can enjoy delicious traditional Filipino and western style food and ice-cold beverages at the farm's beautifully designed and decorated open-air restaurant, aptly named 'Café Pitaya'. Guests have their choice of ground level and rooftop seating, all of which offer a beautiful view in all directions. The restaurants' double kitchen design has the capacity to offer on-site catering services for any size group and when combined with the farms' one of a kind natural beauty and unlimited seating capacity, it makes PTC Farms the ideal venue for private special events of any size including weddings, birthdays, karaoke nights or any other special event to be considered.

The farm also offers souvenir t-shirts, coffee mugs, fresh dragon fruit cuttings for home gardens, and fresh dragon fruit can be purchased when in season. For guests with children in tow, the farm's petting zoo is sure to be a great experience for all.

Open from 8:00 AM seven days a week, to further complement what this soon to be D.O.T accredited agri-tourism farm has to offer, guests can call two dedicated 12-seater 'PTC Farms Shuttle' trikes that will pick up guests wishing to visit the farm from any island location and return them when their visit has ended, and at only the regular island trike fare rates.
