RegoEx Secures Funding Grant Led By Polygon

Delhi, India Mar 5, 2022 (Issuewire.com) - We RegoEx, a Cryptocurrency Exchange platform, are pleased to announce that we have successfully secured a grant from Polygon Foundation to develop our platform and for the successful implementation of our projects.

About Polygon: Previously known as Matic Network, Polygon is a framework for building interconnected blockchain networks. Polygon is described as Ethereum's internet of Blockchains, designed to facilitate a future where distinct blockchains no longer function as closed-off silo's and proprietary communities, but instead as networks that fit into a broader interconnected landscape. More than 7000 Decentralized Apps are currently being built on Polygon Network and the company has raised $450 million in its latest funding round.

RegoEx aims to use the most secured blockchain technology to create a trustworthy and simple yet robust exchange platform to facilitate cryptocurrency transactions instantly. The project majorly focuses on solving the problems faced by centralized and decentralized exchanges; we aim to provide a hybrid crypto exchange, which will be based on the functionality and liquidity of centralized platforms, as well as the confidentiality and security of decentralized platforms.

Regos' Centralized exchange will have the following salient features:
• Low-brokerage fee
• Easy P2P (peer-to-peer) transfer with ZERO cost
• Localized Currency Support (Easy INR/Fiat deposit and withdrawal)
• Two Click Trade
• Advance Trade
• Automated KYC Process
• Exclusive Tokens
• Analytics & Statistics
• SIP Investments
• Basket Investment

Along with a Cryptocurrency exchange platform, at RegoEx, we will also be launching partner projects under the same name. The projects will include Rego Tokens and Rego NFT Marketplace.

REGO TOKENS – Rego Tokens will be utilized on RegoEx's platform to purchase altcoins and users will be able to earn through Staking, Referral, and providing Liquidity. REGO is a fungible token, which is built on Polygon (Matic) network, using the ERC 20 standard, and will be used as an internal currency on our ecosystem.

REGO NFT MARKETPLACE – In our NFT Marketplace, we will be working with exclusive digital art creators and celebrities across the world for special, exclusive airdrops. But since it's a marketplace, any content creator can come and launch their own NFT collection with ease and with a very low minting fee. Our focus will be on selling Digital ART and NFTs while keeping the platform easy and ready to use for traditional artworks as well.

"Going forward, we will also use advanced AI based algorithmic trading options for traders so that they can earn while they sleep! We believe that our timing is perfect to launch a DEX platform and build the future Crypto Exchange that every Crypto investor needs. Our USP would be to conduct thorough due diligence and provide traders and investors proper knowledge so that they can make an informed decision on their investments."

REGO Tokens Airdrop is LIVE Now!

Rego Tokens (REGO) Airdrop is currently running and is available for a presale. The Airdrop pool which totals up to 30 million REGO or $3million worth of tokens can be purchased by INR and Cryptocurrencies like BTC, ETH, and BNB. You can avail REGO Tokens by doing simple tasks like being a part of our community on Telegram, Instagram, and Discord and growing it by inviting your friends to the community. Full Details about the Airdrop can be obtained from the website and official social media channels.
