

ShoeFy Joins Partnership With Polygon Studios

ShoeFy joins forces with Polygon Studios followed by its upcoming Car Racing Play 2 Earn NFT game on Polygon

Singapore, Singapore Mar 10, 2022 ([Issuewire.com](https://www.issuewire.com)) - [ShoeFy](https://shoefy.io), the World's first Defi utility platform for NFTs and Digital Fashion, announces Strategic Partnership with [Polygon Studios](https://polygon.studio). Polygon Studios joins ShoeFy to scale the growth of their first 3D Play 2 Earn Car Racing game on Polygon as part of Shoeverse Metaverse.

ShoeFy is an innovative decentralized platform that combines Non-Fungible Tokens (NFT) and Fungible Tokens (FT). It is a futuristic NFT project that utilizes cutting-edge DeFi tools to maximize returns by providing options for farming and staking using its NFT. Each NFT is programmatically generated with a unique digital pair of shoes on the platform.

With this, the NFT fashion brand enters the Metaverse space to leverage Polygon's layer 2 solutions to increase the scalability of the \$SHOE Token & NFTs (non-fungible tokens) for the upcoming Play 2 Earn Car Racing Game for in-game transactions, \$SHOE rewards distribution, profit sharing, and staking programs.

"With Polygon's support, we will now have access to faster transaction speeds and lower gas fees across our gaming ecosystem, allowing us to be more attractive to New & OG developers, creators, and gamers in the Metaverse Space. We're delighted about the progress ShoeFy has made in the last six months and the partnerships we've built along the way. Leveraging Polygon's technology, ShoeFy continues to lean into blockchain and NFT Gaming, bringing innovative gamification to the rapidly growing Web3 and metaverse economies." - Michal, CMO ShoeFy

The **rNFT** (CAR NFT), which will be available on Polygon as part of the said game, can be obtained

from secondary markets after ShoeFy Genesis sNFT Mint coming later this month or **"MINTED FOR FREE" as an exclusive perk of minting the Genesis ShoeFy sNFT (SHOE NFT).**

sNFT Whitelist is now Live at - <https://www.shoefy.io/whitelist>

ShoeFy NFTs are a collection of 10,000 unique, procedurally-generated collectible sNFT or Shoe NFTs, stored as ERC721 tokens on the Ethereum blockchain.

Each NFT is Hand-Drawn in-house at ShoeFy studio. Inspired to make a mark in the Fashion industry, ShoeFy not only seeks to set an example for Fashionistas but also for digital NFT collectors, Shoe Lovers, and Gamers looking for a perfect Open World Metaverse to connect, socialize, create & earn rewards.

The ShoeFy sNFT collection and what makes it so special

ShoeFy sNFTs are from a collection of 10,000 sNFTs (shoeNFT) designed by hand, consisting of various layers to form a unique digital shoe. The collection is spread across four elemental concepts of Fire, Water, Earth, and Wind, which are represented by the characters Phoenix, Whale, Taurus, and Pegasus respectively. The 10,000 elemental shoes are subdivided into Common, Unique, Rare, Epic, Legendary, and Mythic (God, Devil, Alien) where, the more extreme details they have, the rarer they get.

What is NFT Layer Farming & NFT Finance ShoeFy offers

Layer Farming is a concept where users can stake their \$SHOE tokens for a particular duration based on Rarity (higher the rarity, higher will be duration and SHOE to be staked).

Each NFT could mint entirely based on rarity; each layer will unlock the mint at fractional periods at regular intervals. This gives SHOE holders and new investors more power to be a part of the ecosystem.

If you get to mint the Genesis NFTs or buy one from secondary markets, the benefits of being a ShoeBeast collector are phenomenal and go even broader beyond the ShoeFy ecosystem.

As part of the SHOE token & "GENESIS sNFT" holder, you are eligible to:

- Get access to Private Discord servers and discuss New Investment opportunities
- Early access to ShoeFy NFT Marketplace and INO launches
- Participate in Shoeverse Metaverse; Play 2 Earn games and contests helping you earn, rent, and scale in the metaverse.
- Be a part of Upcoming TRIBEHOUSE
- ShoeFy NFT staking DeFi portal where you can stake any NFT in your Decentralized wallet and earn HIGH APY for NFTs sitting idle.

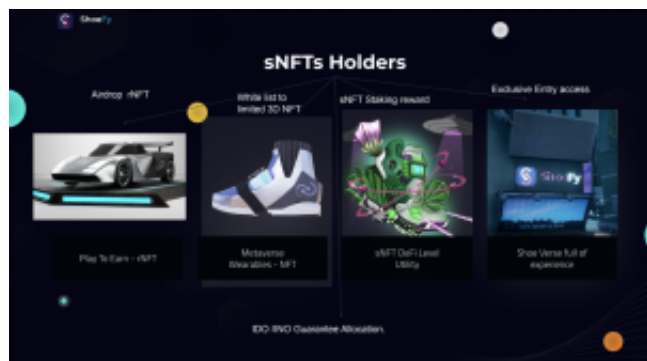

ShoeFy seeks to empower the World by unlocking the True potential of NFTs and its DeFi capabilities exclusive to the ShoeFy community across the globe, improving the lives of millions of people with passive income opportunities.

Are you Ready!

About ShoeFy

ShoeFy is an innovative decentralized platform that combines Non-Fungible Tokens (NFT) and Fungible Tokens (FT). It is a futuristic NFT project that utilizes cutting-edge DeFi tools to maximize returns by providing options for both farming and staking using its sNFT. Each NFT is programmatically generated with a unique digital pair of shoes on the platform.
