The Academic NFT Conference Announces its Student NFT Project Contest

Seattle, Washington Mar 11, 2022 (Issuewire.com**)** - The Academic NFT Conference, a first-of-its-kind hybrid conference whose focus is on supporting innovation in the NFT and Web3 space through academic involvement, announced its first student NFT Project Contest today. The Fall 2022 hybrid conference, in partnership with multiple academic blockchain student councils and groups and top NFT industry brands and influencers, is hosting paneled discussions around academic entry into the Web3 space by utilizing blockchain-based tools, such as NFTs.

To support the conference's dedication to onboarding innovation in the academic space, its first Student NFT Project Contest was announced, helping bridge the next generation of academics into the utilities of the Web3 economy with NFT models. The contest, which application and contest details can be found at: https://academicnftconference.com/academic-nft-contest is offering professional advisement, and networking opportunities for students (18+) to build out NFT projects around their academic pursuits. Bridging more innovation and growth into the Web3 and NFT space, and becoming beacons for entry to students, and staff within academia worldwide.

The Academic NFT Conference brings many leading names in the academic and NFT industries to their panels and opens up the discussion around higher education's role and opportunity within Web3's future development.

Conference details include:

- Top academic NFT panelists
- Student-led academic NFT project innovation
- Presentations of best practices in both academic and business NFT use cases
- Free virtual participation
- Networking events pre-and post-conference
- Community driven models & IRL opportunities
