The concept of Electric Curtains are buzzing around the home and decoration sector

Delhi, India Mar 12, 2022 ([IssueWire.com](https://www.issuewire.com)) - [Electric curtains](#), also known as “intelligent curtains” are operated through electric curtain controller systems. You will be able to open or close the curtains sitting at the comfort of your couch or laying down on the bed with remote control. That would be an amazing experience. Isn't it? The wireless controller in your hand is linked with the curtain motor attached to the curtain hanger. The wireless controller is powered with batteries available in the market

while the main machine embedded with the curtain may need an electric supply. However, many new models are now introduced in the market with battery-supported motors. In this domain, you have to first consult [Somfy](#) has introduced the ultra-system and ultra-quiet motorized systems for all types of electric curtains.

The new generation Glydea 60e DCT of Somfy is designed to hand any kinds of heavy curtains. If your windows are really large or you want to hand in large curtains to give the windows a kingly look, Glydea 60e DCT is the perfect one. Apart from this version, Somfy offers Glydea 35e DCT, Glydea 35e WT, IRISMO Wirefree 45 RTS, and many more. Somfy also has some exclusive quality remote controllers to offer. Some of these remote controllers are “one-in-all” to control all the curtain units in the house or office. Again, some remote controls are designed to automate the **electric curtains**. More advanced forms of remote controls are designed to sense the interior energy and control the curtains or blinds as per your instructions.

This new generation of curtains is an innovative concept in terms of their performances. The **electric curtains** can be controlled freely and remotely with minimum human intervention. It saves time and energy. It is also appropriate for the individual needs of family members. Children in absence of parents need not draw curtains physically. The same is applicable for an ailing family member who finds it tough to pull a curtain back when the sunlight is falling on the windows. The options available with Somfy are amazing. Moreover, they are available online. So, you can consult with their customer service any time over the telephone or filling the inquiry form.

Apart from top-quality **electric curtains** that have made Somfy the market leader in India, they also offer various other automated systems such as the rolling shutter, awning, interior blind, gate, projection screen, garage door, bollards, traffic blockers, and boom barriers. All these are automated or semi-automated systems having multiple applicability.

About Somfy: Somfy is the first roller shutter motor inventor. Today, they are leading the market of home automation with great home automation products including smart curtains and blinds. In the Indian market, Somfy is a trusted brand offering a large array of automated products at reasonable prices.
