“Venture funding in 2021 broke all records. But there is one stat that did not move at all-female founders raising just 2% of venture capital money. In India, the situation is even worse. We at leap.club are on a mission to bring gender equity in all aspects of business, work and social life. There are 800+ female founders who are our members and through our interactions with them, we have learnt that access to capital and networks is a big blocker. WE realized we are in a position to make a difference and ‘the table’ was born,” say Ragini Das and Anand Sinha, Co-founders, leap.club.
