

Angel Traders - Build your future with investments

Bogota, Colombia May 1, 2022 ([Issuewire.com](https://www.Issuewire.com)) - Angel Traders is a company that trains beginner traders. We contacted two of its founders, Roman and Angel. As they say, the goal of the project is to teach people from all over the world how to earn on the Forex market.

The company was founded in 2018 in England and continues to grow and gain momentum to this day.

For 4 years, it has made it to the top ten among successful trading companies. Now the clients of this project are representatives of different countries, but the company is most popular in England, Brazil, Mexico, Colombia, and Spain.

We asked the founders of Angel Traders how they managed to create such a popular project and become a leader in just 4 years. As they say, the main thing is to love what you do and devote all your time to it. Once upon a time, the founders had several successful companies, which they eventually sold in order to devote themselves entirely to trading.

The Angel Traders team teaches people how to trade on the currency exchange. But it all started with the fact that Roman and Angel told their close friends how to trade correctly so as not to lose money, but, on the contrary, to increase it. At that time, they themselves had been trading on the stock exchange for almost 5 years and were making stable money on it.

Later, Roman and Angel noticed that their advice was working, improving their skills and bringing the guys a lot of money. Based on this experience, they decided to establish a small platform where they published their ideas and taught everyone how to trade. Their trading school turned out to be such a profitable and interesting business that the guys decided to sell all the business they had at that time in order to invest all the money in the development of this platform.

“We have an unusual approach. We don't give dry theory to our clients because we know it doesn't work. First, we conduct an analysis, on the basis of which we make forecasts for currencies and their prices in different periods. Then we draw up graphs based on these forecasts. And after that, we give our clients ready-made trading ideas that they can observe in real-time. Also in our team, Angel Traders did a very good job on the theoretical part and put all the basic knowledge on trading into a file of fewer than 10 pages. Now clients do not need to go through thousands of pages on the Internet to gain knowledge, they just need to study the theoretical instructions of the Angel Traders team. Clients quickly understand everything in the trading process. This approach really works. We tested it on 5000 of our clients. And then we work individually with each client in personal messages. They can ask a question at any time of the day and get an answer in a timely manner.”

“Also, our traders and developers have created a one-of-a-kind trading robot in 2 years and we called it “Angel Robot”. We are confident that this is the best Forex robot that really works and makes a profit. In 2021, the robot closed 92% of all trades with a profit, which is more than 1900 trades. And the profit of the robot was 378% in 1 year! It's just incredible! Now we also provide our clients with the Copytrading service. Any client who has purchased this service can connect their trading account to our robot. Such clients do not need to do anything at all, all transactions will be opened and closed automatically, repeating the operations of our robot, ”says Roman.

“You don't need the talent to trade. Absolutely everyone can make money in the Forex market. It's just that each client needs basic knowledge and a mentor who already has experience and who can guide and tell how it works. Angel Traders does just that. In 2021, we trained over 5,000 people in trading. And this is just the beginning! Now we are in the top 10 best trading schools, but in the near future we will become number 1 and create the largest trading community in the world and train more than 1 million people.”

“When I say 'we', I mean all Angel Traders employees. This is such a big project that this year we opened 2 more offices in other countries. Now our company employs more than 100 people in 3 countries of the world, namely in England, Spain and France. Basically, all our guys are professional traders who have been trading on Forex for a very long time. And it is beneficial for them to work in our Angel Traders team, because we give our employees an unlimited trading budget, from which they receive a good percentage of the profits, and what percentage, we may tell in the next interview,” say the founders Roman and Angel.

Every year the company's turnover is increasing, and the number of people who decide to start trading is increasing. Roman and Angel say that Trading has gained such popularity due to its accessibility and freedom of action, because you can trade on the foreign exchange markets from anywhere in the world and with minimal investment, using only a phone. This allows you to constantly travel without being distracted from work. But the most important thing is that it brings high and stable earnings.

The Angel Traders project is gradually expanding its geography, teaching trading to people from all over the world. In 2021, the company's turnover amounted to more than \$30 million. And for 2022, Angel Traders plan to increase this amount by at least 3 times. “I think that we will even exceed this plan since we have already earned \$ 25 million in the first quarter,” says Angel.

Many Angel Traders clients become successful traders and trade in their free time, and some even quit their main jobs and dedicate their lives to trading, traveling and enjoying life.

For the next 2 years, the company plans to expand its geography and make separate platforms for each country. Follow the Angel Traders team on Instagram and follow the company's updates.
