

Anthony Raspa integrated all pharmaceutical workflows at FH Faulding

This Press Release is written to inform the readers that Anthony Raspa supported key business requirements whilst remaining compliant with security.

Perth, Western Australia Apr 13, 2022 ([IssueWire.com](https://www.issuewire.com)) - Serving as the project manager at Power, [Anthony Raspa](#) worked for the successful leadership of the management and delivery of technology during a strategic restructure and heavy stakeholder change. Furthermore, he managed a diverse team and led the development of a long-term vision for Programs, Projects, Business Intelligence, Service Delivery and Technology across the organisation. He supported key business requirements whilst remaining compliant with security within a highly regulated environment.

Formerly working as FH Faulding, Anthony integrated all pharmaceutical workflows from Doctor to Pharmacists dispensing. He also enabled Mayne Health HL7 records for delivery of pathology result from non-repudiation. Anthony worked heavily with hospitals and doctors including Darwin to Katherine and Alice to Tennant with the area manager.

Pertaining to his education accreditations, Anthony Raspa is currently studying Master of Business Administration at Australian Institute of Business. He completed Associate Diploma of Applied Science in Computing in 1994. Thereafter, he became a Certified Novel Administrator in Dimension Data.

About Anthony Raspa

[Anthony Raspa](#), a former Transition Manager, worked to drive the design and delivery of major transition projects for Government Departments and Enterprise as well as infrastructure and other works for clients in the mining industry, including business continuity, disaster recovery, IT risk management, and change management. He optimised project outcomes through sound solution design, full program, and project documentation, contract deliverables, and stakeholder engagement.
