

Any Audible Converter 2.0.0 Adds Support Audiobooks and Podcasts Conversion from Audible Plus

Airmont, New York Apr 28, 2022 ([IssueWire.com](https://www.issuewire.com)) - On April 19th, 2022, Any Audible Converter updated and released version 2.0.0. This is a very exciting moment as it introduced a powerful feature expected by an increasing number of long-awaited Any Audible Converter users. Version 2.0.0 adds the support for converting audiobooks and podcasts directly from Audible or Audible Plus. Up to now, Any Audible Converter is also the first brand of its competitors to support converting audiobooks from Audible Plus.

Audiobooks in Audible require additional purchases to be permanently downloaded, while audiobooks in Audible Plus only support downloading on mobile devices and will become invalid once the subscription is cancelled. The audiobook files downloaded in both of them are digital rights management (DRM) protected, they are encoded with AA or AAX format. There are very few media players that support AA/AAX so far, which means that many audiobooks are impossible to listen to at any time, depending on location, device, signal, etc. As a result, we have received a lot of requests from loyal users who want to convert audiobooks from Audible or Audible Plus directly into a universal format. Any Audible Converter has always been committed to providing users with the best audiobook conversion service. Upon receiving the request, Any Audible Converter immediately decided to add this function in the new version.

Any Audible Converter was initially released on December 17, 2021, compatible with Windows PC and Mac since release. And it supports importing audiobooks in AAX/AA format from the local computer and converting them into common formats such as MP3/M4A/M4B. The latest version 2.0.0 has added support for converting audiobooks and podcasts directly from Audible/Audible Plus, catering to the needs of numerous users. And became the first to support converting audiobooks from Audible Plus, establishing its leading position.
