

Best 4K Laser Home Projector 2022

Dangbei, a famous Chinese brand on the same level as XGIMI, released a new high-end projector-Dangbei Mars Pro 4K Laser Projector. As the global production of Dangbei, Dangbei Mars Pro is equipped with the highest configuration.

Avon Park, Florida Apr 20, 2022 ([Issuewire.com](https://www.issuewire.com)) - Over the years, the trend has shifted from only an office-based projector to have a proper home theater system within the confines of your home. In this regard, the most prominent 4K home projectors in 2022 are the Dangbei Mars Pro 4K Laser Projectors. This projector has a laser as the main light source and has excellent brightness, even in broad daylight.

Appearance/Outlook

The make is of a glass IML suspension panel, along with an aluminum frame, aircraft-grade, on the front panel. This gives this projector a very sophisticated and futuristic style and design. For heat dissipation, there are vents incorporated into it in the form of back panels and side panels. The noise level is reduced to as low as 24 dB, with the help of its penetrating design. This reduces not only the level of noise it produces but also helps in better air circulation.

There is a shiny mirror-like top panel, with a tactical switch on the upper panel. Moving to the backside of the projector, there are different interfaces available, which include 2 HDMI, 2 USB 2.0, 1 RJ45 LAN, 1 3.5 mm earphone port, and 1 S/PDIF. The best thing is that all of these are compatible with different devices in use, including game players, TV boxes, computers, and other such devices.

Image Quality

Moving to the image quality of this 4K laser home projector, we see that it's vivid and clear, with all the details displayed brilliantly. This theatre projector has not only 4K resolution but also has 3200 ANSI lumens brightness. What does this mean? Well, it projects clear, bright, and distinct colors on the screen not just under indoor lighting, but also under ambient lighting and in broad daylight.

This home laser projector provides a whole experience with its 300 inches of screen projection and an amazing viewing experience. It has multiple inbuilt features, like auto keystone correction, autofocus, intelligent screen alignment, and also intelligent obstacle avoidance. This saves the user from adjusting these things on their own, as they are already inbuilt to auto adjustment for a quality experience and great quality image.

It even has the TÜV Rheinland Low Blue Light Certification. This certification is provided under the promise that the projector is more caring for the human eye in comparison to the other ones available in the market.

System Design and Features

This 4K laser project has an MT9669 chip (flagship), along with 4G RAM and 128 ROM. It is easy to operate and configure for its users, allowing them to download multiple files and videos. It has an in-built UI assistant and operates the Android 9.0 system. The design and outlet are sleek, yet simple, with various detailed features, including time, weather and memory status, etc.

It offers Bluetooth 5.0 along with 2.4G/5G Wi-Fi connectivity, which is even smoother to connect with, with its quick wireless connectivity option. The sound system on the Dangbei Mars Pro is of two 10W speakers. The projector system supports Dolby Audio and DTS for clear sound.

All in all, with its many distinct, futuristically innovative features and amazing memory space, the project is value for money in the existing market this year. With its amazing processor and UI features, it is available for \$1,799, which is a decent price for the market it is competing in with its many specs.
