

Cambio Healthcare Systems announces PFM implementation in Oxford Health NHS Foundation Trust

Reading, Berkshire Apr 13, 2022 ([IssueWire.com](https://www.issuewire.com)) - **Cambio UK** today announced the implementation of its Patient Flow Management (PFM) solution into Oxford Health NHS Foundation Trust. Cambio's PFM will facilitate a single point of access model for multiple services in the Secure Provider Collaborative led by Oxford Health.

Oxford Health NHS Foundation Trust is the lead provider for the Secure Collaborative, delivering low and medium secure mental health services for Adults. PFM will enable the management of new referrals, assessments, waiting lists, and general oversight of patient status in treatment pathways.

Cambio PFM will enable the single points of access to work more efficiently and share data with collaborative partners in near real-time. This streamlined system will replace existing manual processes and hopefully save clinical and administrative time and continue to improve the experience for patients across all providers in the collaborative.

Cambio PFM will support Oxford Health's activities to improve forensic care pathways for care closer to home and in the least restrictive setting possible. Cambio PFM has reduced out-of-area placements in similar applications, making it a valuable addition to Oxford Health's toolset.

Karen Drabble, of Oxford Health NHS Foundation Trust, commented:

"Cambio is a trusted partner across the UK and international health systems. We are excited to be working with their experienced team to establish vital new capabilities across our provider collaborative."

Mark Thornton of Cambio UK added:

"The provider collaborative led by Oxford Health NHS Foundation Trust is already making great strides in improving the lives of those who need secure mental health care, and their families. We are delighted to be a part of ensuring as many people as possible are treated close to their homes and support networks."
