

Can ChillWell Air Cooler be the solution to this Summer heat? What are your thoughts?

Enugu, Nigeria Jun 8, 2022 ([Issuewire.com](https://www.issuewire.com)) - Recently, there are a lot of portable air coolers to cool down your personal space without having to pay the hefty fees associated with full home air conditioner systems. The [ChillWell Air Cooler is one of them.](#)

ChillWell Air Cooler is a portable air cooler that uses evaporative cooling technology. It can cool down your personal space within 30 seconds. Powered by a rechargeable internal battery, the ChillWell portable air can last up to 3.5 hours on a single charge.

As advertised by the manufacturer, ChillWell Air Cooler uses Hydro-chill technology to turn hot air into the cold, moist air. It is very compact and extremely portable with a futuristic design.

With just three steps, the ChillWell air cooler can be set up. The battery lasts longer with some advanced features not found in similar models.

In addition to offering rapid cooling, ChillWell Air Cooler also humidifies, making it a multi-function cooler.

With its simple design, the ChillWell air cooler can be used by anyone irrespective of his technical knowledge. It can be set up just anywhere without any hassle.

ChillWell Air Cooler has the following features:

Four fan speed: ChillWell Air Cooler comes with four-speed levels namely; low, medium, High, and Turbo.

In-built rechargeable battery: The ChillWell air cooler is designed with a strong battery with thousands of charging and discharging cycles.

Spongy Cooling Cartridge: ChillWell Air Coolers feature a cooling cartridge to enhance the ChillWell cooling experience.

Multiple LED light colors: ChillWell coolers offer several light colors to select.

550ml Storage Water tank: ChillWell air cooler features an easy top-pouring water tank with a capacity of up to 550ml.

Carrying Loop: To aid its portability, ChillWell Air Cooler features quality and a strong carrying loop.

Mood light: ChillWell Air Cooler is a stylish air cooler.

How to use the ChillWell Air Cooler:

The ChillWell air cooler needs to be charged with USB-C Cable from any power adapter before use.

After charging, fill the tank with water, insert the cooling cartridge and turn it on by pressing the fan button.

With This, the ChillWell air cooler will start blowing Cooled and moisturized air.

To enhance the ChillWell effectiveness, the cooling cartridge is made to be cooled in a deep freezer and also ice cubes are preferred to Water.
