

Cartooning Yourself Online with One Click, VanceAI Toongineer Cartoonizer Makes It Widespread Than Ever

Hong Kong, Hong Kong S.A.R. Apr 11, 2022 ([Issuewire.com](https://www.issuewire.com)) - VanceAI, a fast-growing image editing software company, has launched the Toongineer Cartoonizer feature. It provides a solution for everyone to cartoonize their photos with AI in one click.

Cartooning people's images have been quite popular in recent years. Due to the improvement of AI tech, creating unique cartooned personal characters becomes ever close to life. Compared with the old method of designing and drawing anime one by one by Cartoonist, which is slow and not widespread enough, vast requirements on one click to make real faces to cartoons and anime contributed to the emergence of online AI Cartoonizer.

VanceAI has wholly concerned with people's demands on a one-click AI Cartoonizer. Hence, VanceAI Toongineer Cartoonizer appears in the view. This Cartoonizer provides a way to make personal cartooning images more common instantly. And it offers users two modes for cartooning photos with one click. As an AI-Driven tool, this cartoonizer adopts AnimeGANv2 to automatically make a real face photo into a cartoon. And the Cartoon mode makes photos in an unrealistic or semi-realistic style character; the Anime mode creates character images more on the detail of settings and use of "camera effects," which is more complex and more realistic. VanceAI Toongineer Cartoonizer can turn photos into cartoons and anime like an artist.

Despite Toongineer Cartoonizer, VanceAI also provides other online image editing features such as VansPortrait, BGremover, Image Enlarger, etc. It also includes an API service for industry developers to add VanceAI's image editing features to develop their photo editing app or achieve higher work

efficiency and improve image quality in the photo editing area. VansPortrait also supports Anime mode, so that people can use this feature through the VansPortrait tool. As VanceAI develops a complete workflow when the image is successfully processed, it supports personalized workflow management, and customers can add their workflow according to their needs.

VanceAI is a fast-growing photo editing software company that provides professional online photo editing tools. A wide range of AI-Driven photo editing tools provides people access to edit photos through the tools provided by VanceAI. It has also developed intuitive and powerful cloud-based solutions driven by advanced AI technology since 2020. The energetic and ambitious company VanceAI has expanded its products range to 15 cloud-based creative tools to spark people's creativity, simplify daily workflows, and boost work efficiency. It aims to release more AI-driven and time-saving image editing solutions in the following years. Go and check more about VanceAI products on vanceai.com.
