Cosmetic dentistry is a branch of dentistry in which the dentist performs numerous procedures to improve the aesthetic appearance of a person's teeth and gums. However, cosmetic dentistry not only focuses on improving the aesthetic appearance of the teeth but also on improving the overall oral health of a person. Cosmetic dentistry does not focus on treating any dental problems such as gum disease or preventing any oral health issues. At the same time, cosmetic dentistry is more about giving smile makeovers by resolving dental issues such as chipped teeth, missing teeth, crooked teeth, and discolored teeth.

**Cosmetic Dentistry Services On Offer At Choice Family Dentistry**

Professional teeth whitening solutions by Choice Family Dentistry are one of the simplest and most affordable ways to get pearl white teeth and a brilliant smile. Professional teeth whitening is provided at their office and is one of the best options for those having stained or discolored teeth. Those with moderately decayed teeth can opt for dental inlays and Onlays that can increase the strength of the teeth by 75% and can last for a long duration if maintained properly.

The dental office in Rancho Cucamonga also offers custom-made porcelain veneers that help in the straightening and aligning of the teeth without the help of any aligners or metal braces. Since it covers the front surface of the teeth, it improves the tooth color and the overall aesthetic appearance of the teeth. The dentist in Rancho Cucamonga provides best-in-class dental crowns ideal for those whose teeth have been damaged beyond the point of repair. Among the different dental crowns available, porcelain crowns are the most popular. It is durable and also looks similar to that of a natural tooth.

Choice Family Dentistry also offers clear aligners that can be used for straightening the teeth. They are transparent and invisible, making it hard for others to notice that the person is wearing aligners. It is also comfortable to wear since the person need not worry about the discomfort otherwise caused by traditional braces, which comprise metal brackets and wires. It can be easily removed while eating, and one can insert it after brushing. Thus people can be assured of improved oral hygiene with clear aligners.
