

EASYBOM Introduces Its Electronic Components Information Aggregation Platform

The company aims to connect electronic components providers with purchasers, suppliers, and engineers with its big data of electronic components information.

Seattle, Washington Apr 15, 2022 ([IssueWire.com](https://www.issuewire.com)) - EASYBOM, an electronic component information service provider, has introduced its comprehensive information aggregation platform. EASYBOM is dedicated to providing the latest electronic components information services for electronics industry professionals who are looking for electronic components like capacitors, resistors, inductors, and ICs, and also find out the latest prices according to the current market conditions.

An EASYBOM representative explained, *"EASYBOM is a one-stop solution for electronic parts/components. We have the latest big data technology and gather billions of market data in real-time. Therefore, the information available on EASYBOM will be useful to electronic industry professionals as we provide accurate pricing and transparent data that save time and money."* In addition to comprehensive data and prices, the company can also analyze the inventory risk index, price risk index, and supplier integrity index. The index can reflect the market, in which the index data can be used to show market trends in time and useful for purchasers to choose a proper supplier for the electronic parts they need.

EASYBOM has a comprehensive range and big data of electronic parts available in the market. Its website is designed to make industry professionals find their electronic components easily. EASYBOM website has different categories for a great user experience. The following categories are available on the EASYBOM website, including; Integrated Circuits (ICs), Passive Components, Electromechanics, Electrical Connectors, Tools and Industrial Supplies, Optoelectronics, Power Equipment, Electrical Cables Wires, Circuit Protection, Discrete Semiconductor Products, Sensors, Transducers, and Test & Measurement. In addition, each category has different electronic parts information with its specification, stock, prices, and distributor information.

About EASYBOM

EASYBOM is an electronic components finder platform. It aims to connect electronic components suppliers to customers like electronic engineers and purchasers with comprehensive real-time data based on market trends and stock availability. EASYBOM works with thousands of reliable manufacturers to provide accurate data and information. Some of them include DigiKey, Arrow Electronics, Avnet, LCSC, Newark, Rutronic, and more. EASYBOOM is a big data electronic platform and one of the best electronic search engines on the internet. Moreover, they strive to provide high-quality product information in a real-time manner.
