Bengaluru, Karnataka Apr 15, 2022 (Issuewire.com) - School ERP

ENTRAR provides customizable and configurable modules, this software to manage your school or college efficiently. Automated comments for every student profile are maintained and frequently updated for the graceful progression of each student. This serves as a referral purpose for future staff who are

going to be working with any student. Being the Best School Management System, Entrar delivers customizable and configurable modules, this software to manage your academic council efficiently. Automated commentary for every pupil profile is maintained and constantly streamlined for the elegant progression of each pupil. This serves as a referral purpose for upcoming staff who are going to be working with any pupil.

[School Management Software](#)

ENTRAR offers unlimited administration and student logins to use their system, alongside unlimited courses and batches. An online registration and tracking facility makes registration for the admission method less complicated and quicker. The admission procedure is simplified by this module, which helps the coed follow needed method flows arranged down by the institution.

ENTRAR is the clean and trendy school/college administration and management software system possibility that covers everything from exams and assignments to budgeting and internal messaging for all staff. Topic coming up with using course materials, online assessments, ebooks, student projects, discussion forums, time-tables, blogs, podcasts, etc., is contained in this module. Its engagement between teacher and student is powerful enough to attain sensible results.

[GPS Tracking](#)

Our Transport and Fleet Management system, combining GPS and GPRS, has the power to enable live tracking of transport vehicles using the parent/student mobile application or the staff-student web portal application. Automatic SMS notifications are delivered to users once the vehicle reaches various trigger points (from the beginning of the trip to 5-10 minutes before the pick-up/ drop points until finishing the trip).

School bus tracking app

NFC cards facilitate tracking every child from the instant he/she boards the bus or enters the institution gate, right up to the moment he/she reaches the drop point or leaves through the institution gate. The NFC card, in the form of student identity cards with an inbuilt chip, has no radiation, not like the Bluetooth card, and can be provided by ENTRAR.

Transport Management

A transportation management system is a provisioning platform that uses technology to assist day to day plan, execution, and optimize the physical movement of students, both incoming and outgoing and our Transport and Fleet Management system, combining GPS and GPRS, has the power to enable live tracking of transport vehicles using the parent/student mobile application or the staff-student web portal application.

School Mobile App

We have developed a complete mobile app solution for all the schools, colleges, and universities that facilitate both parents and students to connect with teachers and also the administration. This school Mobile App includes attendance Management of Students/Staff within the institution with transparency. It includes multiple subjects, classes, online secured marking, instant updates, maps to find daily activities & events, payment gateway integration, worksheet, and can send information to parents.

Student Information System

The student information system has gained huge popularity within the educational sector as a result of its distinctive characteristics that have helped infinite schools and better educational institutes vastly. [ENTRAR](#) helps the academic campuses in streamlining and managing all the tasks of all student records of the whole learning journey of a student among the institution. From creating Identity card (admit) cards and dynamic letters, Transfer Certificate process, birthday reminders, to complete academic records you name it ENTRAR has it all.

Fee Software

ENTRAR gives you a complete fee management software with an option for online fee payments, with our fee management software, you can send automated fee reminders to all the parents. This module efficiently manages all students' fees. Salient features include multiple receipt books, payment methods, collection clerks, and credit card/debit card/net banking. It also has simple and easy reporting formats which include due, overdue, cancellations, and discounted receipt reports.

Library Management

We have a well-organized software solution for a library that helps to provide information on any registered materials present in the library to the user as well as staff. ENTRAR keeps track of the allotment of books to the students and stock management of books to computerize all the in-house operations of the library such as acquisition and cataloging, serials control, circulation, issue/reissue books quickly, etc.

Examination Software

This Examination Software module makes teachers work easily in conducting an online examination which has never been an easy task. ENTRAR has the option to add or remove students, selective subject examinations, instant result declaration, and other features like fill/ view information about the students that are attending the examination.

Report Card Software

This Report Card Software module manages Grades, Report Cards, Skills and Standards, Transcripts, Honor Rolls, and more for institutions easily by adhering to the regulations and automatic updates applicable from the particular education board.

College Management Software

College Management Software automates the higher education sector from admission to graduation and beyond and helps institutions to achieve the mission and goals, increases student enrollment, and it works better and smarter for administration, faculty, and students, and enhances communication between them all streamlining college administration.

Payroll Management

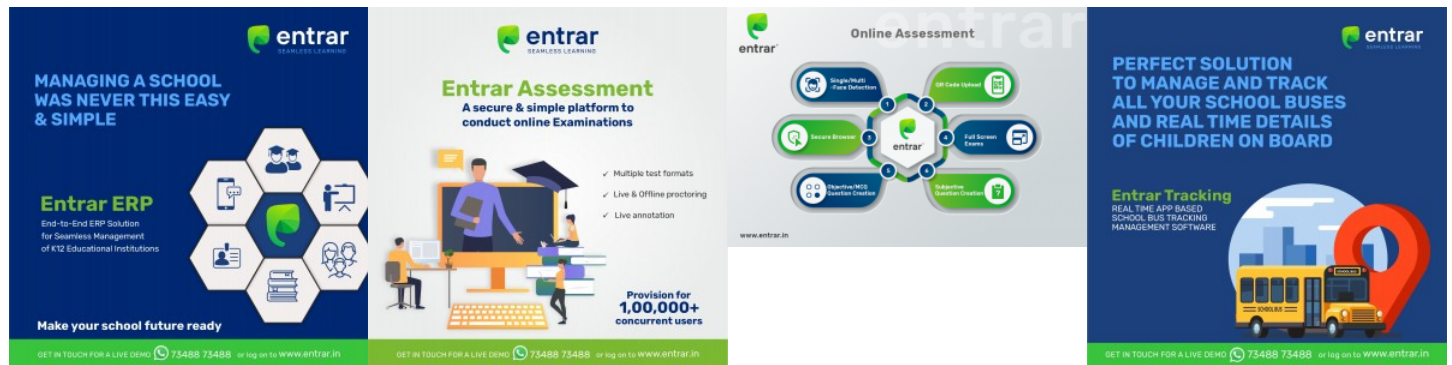

Entrar Payroll Management Software is featured with Easy Salary Configuration, Manage Payroll Input Collection, Streamline your Payout and Accounting, 100% Statutory Compliant (PF, PT, ESI), and many more... Entrar is the leading and most preferred HR and Payroll software provider in India. Managing a small group of children is a task in itself, let alone managing an entire school. That is where **school management systems** are most helpful. There are so many procedures to take care of. Not to mention the tedious job of keeping an organized track of every student, staff, and employee. Before the advent of computers, as we see them today, all these tasks were manually organized. In fact, in some places, they were still being manually organized even after the invention of the PCs.

In the same way, students can access their previous lectures using the mobile application of the school management system. So whether they have missed a class or simply want to revisit the lecture for better understanding, they can do so using Entrar application.

School Management Systems for Parents and Students

School management systems connect the parents, teachers, students, and the school administration seamlessly. [School ERP systems](#) like Entrar benefit the parents and students immensely. Entrar allows parents to access their child's progress reports through regular updates on their performance, it helps them to track their ward by using GPS to know the transport route and ensure their safety.

To state it simply, school management systems like Entrar make the whole process of school administration and communication between all the entities (school admins, teachers, parents, and students) easier and faster. This is why having a modern school management system is important for any technologically advanced educational institute.
