

Goals Plastic Surgery **FOR IMMEDIATE RELEASE

Goals Aesthetics and Plastic Surgery (or “Goals” for short) is continuing to grow as a national industry-leading aesthetic medicine and cosmetic surgery company. Goals has quickly become one of the most notable plastic surgery conglomerates globally

Atlanta, Georgia Apr 11, 2022 ([IssueWire.com](https://www.IssueWire.com)) - FOR IMMEDIATE RELEASE

Goals Plastic Surgery Reinventing the World of Cosmetic Surgery and Redefining Patient Restrictions

Atlanta, April 1st, 2022: Opening yet another location in the Historic District of Downtown Atlanta, Goals Aesthetics and Plastic Surgery (or “Goals” for short) is continuing to grow as a national industry-leading aesthetic medicine and cosmetic surgery company. Goals have quickly become one of the most notable

plastic surgery companies due to stellar client experience, one-of-a-kind services, and the health requirements that make them stand out amongst its competition. While the majority of aesthetic and plastic surgery companies have a strict BMI level restriction, Goals has become the leader in the industry offering services to clients without a BMI restriction. The Goals team is in the works of planning some major community events, offering great opportunities for new and existing clients.

About Goals Aesthetics and Plastic Surgery

Founded in 2016 by its existing chief medical director, Dr. Sergey Voskin, Goals provides patients with a broad list of aesthetic procedures, both invasive and non-invasive, that help them achieve their goals, build confidence and, quite frankly, change lives. The company has quickly emerged as a national leader in the world of aesthetics.

Goals stand out from traditional plastic surgeon settings as the most accessible, dependable, and experienced provider for body sculpting and liposculpture services in the United States, having performed close to 30,000 surgical procedures to date, for patients from over 100 countries around the world. The fast-growing team of surgeons is carefully selected, trained, and supervised to ensure the best client experience. Using various technologies and innovative techniques, our physicians provide patients with unmatched results and care.

Goals are also the sole provider of several procedures and surgical techniques — the DoubleBBL and Flexsculpt procedures — that help our surgical team deliver the results patients desire.

The company is also planning on expanding into the professional development aspect of medicine as well - partnering with several world-class teaching-hospital systems and launching a plastic surgery fellowship program for medical residents who are interested in pursuing careers in elective cosmetic surgery.
