

Gojek Clone App Features The New Online Video Consultation Service

Ahmedabad, Gujarat Apr 11, 2022 ([Issuewire.com](https://www.issuewire.com)) - The Gojek clone app is one of the most popular on-demand multi-service apps in the industry. Recently, a pioneer in on-demand mobile apps has launched its brand new version of the Gojek Clone app with a host of new features.

“We are constantly innovating. This is one of the biggest reasons why we draw so many repeat audiences. Most of our clients aim to deliver unique solutions to their customers so that they can benefit from their niche marketability. We have dedicated our resources to research the market and introduce viable and practical solutions that make the most sense to the industry”, said the spokesperson at a demanding app development company.

Their latest and most talked about feature is the Online Consultation service. This service allows users to get direct online consultation from experts using just the app. The user can launch the app and click on the Online Consultation button and speak to experts instantly. Users can set appointments with experts like lawyers, doctors, accountants, and more.

The pandemic has taught people to be more careful in their physical contact with other people and therefore, this feature is an excellent option to provide your customers with so that they can feel safe and secure while also being able to get any and all kinds of services that they deem important.

The Gojek clone app has been around for over 6 to 7 years. Its most unique feature is the ability to offer access to over 70 different services to a user just on the basis of a single download and a single log-in, unlike many other apps.

Across the world, users have shown a consistent migrating pattern away from multiple apps and towards single apps that offer multiple services. This is why; the Gojek Clone App picked up so much momentum. As entrepreneurs around the globe understood the importance of this format, many have invested and benefited from it.

While the [Gojek clone app](#) and its latest King version have become one of the best sellers, they also specialize in creating other on-demand mobile apps such as on-demand food delivery, on-demand grocery delivery, Uber taxi clone app, handyman clone app, and so on and so forth.

On-demand mobile app development and launch service for almost a decade. They have successfully launched over 2000 apps across the Google Play store and the iOS app store. Having been responsible for the success of hundreds of app owners across the globe, they enjoy a loyal clientele.

Considering the fact that mobile app development has been in the market for so long, their apps have proved to have a special edge over others in the market. They offer a demo of the app for an unlimited duration before the entrepreneurs invest in it absolutely free of cost so that they can test the app thoroughly before getting into the business.
