

Greyhorse Clearinghouse Ltd (UK) Has Launched Artificial Intelligence Powered Blockchain Licenses

London, United Kingdom Apr 1, 2022 ([Issuewire.com](https://www.issuewire.com)) - The License integrates with Greyhorse Clearinghouse Ltd's proprietary AI-powered Weave Integration gateway giving domestic and international financial institutions access to the future of finance via blockchain protocol. Licenses are digital conduits transacting on blockchain subscribed by central banks, pension funds, insurance companies, banking institutions, hedge funds, investment managers, etc. The licenses feature bilateral currency swaps, institutional capitalization, institutional credit lines, asset swaps, etc. All licenses

incorporate a base annualized appreciation value of 25% by default since only 2-3 licenses are offered in respective markets, creating a limited mint function solely at the discretion of Greyhorse Clearinghouse Ltd.

“Credit lines in most emerging markets have been rather suppressed due to geopolitical turbulence, monetary and fiscal policy imbalances, and market dislocation. We are addressing these concerns amongst others faced by financial institutions by integrating them into our technology and establishing long-term capital via a decentralized network accessed by institutional investors,” said Rahim Thawer, CEO of Greyhorse Clearinghouse Ltd.

About Greyhorse Clearinghouse Ltd
