

Marking the Jetson ONE's Six Month Milestone in the EVTOL Sector

Los Angeles, California Apr 23, 2022 ([Issuewire.com](https://www.issuewire.com)) - It has been exactly six months since [Jetson](#) launched the Jetson ONE. To celebrate this exciting milestone, [Jetson has released a new video of the Jetson ONE](#) VTOL take-off and landing as the pilot explores a unique view of the Tuscan landscape.

To continue marking this special occasion. Jetson is pleased to announce their attendance at the auspicious [Top Marques](#), Monaco, Grimaldi Forum, and [VivaTech, Paris](#). Europe's largest technology and innovation event.

The Jetson ONE is to be unveiled by [HSH Prince Albert II of Monaco](#) on Wednesday 8th June 2022. The ceremony will be the first time [Jetson ONE](#) will be seen in public since it entered the market in late October 2021.

The last six months have been an incredible Journey for Jetson. The founders have been busy assembling a highly talented team of engineers and designers, external investor fundraising, and preparing for mass production. The demand for the Jetson ONE has been phenomenal, supporting the company's dream to 'make everyone a pilot.'

“Our long-term goal is to democratize flight. We firmly believe the 'eVTOL' is the future for mass transportation. We are committed to making this a reality.” Said Tomasz Patan, co-founder and CTO.

The Jetson ONE is constructed of a race car-inspired lightweight aluminum space frame and Carbon-Kevlar composite body. It is powered by eight electric motors, and has a flight time of 20 minutes, reaching a top speed of 102 kilometers per hour (63 miles per hour). It runs on a high discharge lithium-ion battery and can carry a pilot's weight of 210 pounds 100kg.

“The Jetson is built like a formula one car for the sky and incredibly fun to fly. Most importantly, the Flight Stabilization System we developed makes flight super easy. We can make anyone a pilot in less than five minutes.” Said Peter Ternstrom, co-founder and President.

About Jetson AB

Jetson is a Swedish company with a mission to change the way we travel. We aim to make the skies available for everyone with our safe personal electric aerial vehicle. Our prototype "proof of concept" was finished in the spring of 2018, and until now we have been very busy working on a consumer-friendly version. That project resulted in Jetson ONE, a commercially available personal electric aerial vehicle that you can own and fly. Jetson was founded by Tomasz Patan and Peter Ternström in 2017. We intend to make everyone a pilot.
