

New “Mobile Phone Cash Reward Sticker” Makes It Easy to Return a Lost Cell Phone

LOST CELLPHONE

RETURN SERVICE

<https://lostcellphonereturnservice.webnode.page/>

Palo Alto, California May 4, 2022 ([IssueWire.com](https://www.issuewire.com)) - Lost your cell phone? The Lost Cell Phone Return Service sticker from Pocket Science Inc. may help you get that lost, stolen, or missing cell phone back. Yes, tracking any mobile phone is now possible, any brand, model, and operator. Find the phone you are looking for in just a few moments. However, this high-tech solution does not always work for the majority of the 10 million cell phone owners that are reported lost or stolen in the United States every year. However, a more simple old-school solution is now available from Lost Cell Phone Return Service, it's a First-of-its-kind Mobile Phone Cash Reward Sticker.

Losing your cell phone can be a nightmare that can turn worse when the device is turned off. There could be a lot of personal and private information, social media accounts, banking details, along with your cell phone photos and videos hiding on your device. So, by attaching the Mobile Phone Cash Reward Sticker you can make it easy for "Good Samaritans" to return your lost cell phone and remain anonymous. No need to crack open the phone for contact information, some Old-Timers used to put a return address label on the inside of their phone case. If the phone you've found has a case on it, pop it off to see if there's anything inside. You might even check inside the battery cover, or if all else fails, you may have to enlist some help from the phone's carrier or from the local police who will try to reunite the lost cell phone with its rightful owner.

The new return service is available for lost cell phones and identification devices, such as identification cards and uncovered identification tags. Good Samaritans can take advantage of this unique opportunity to return the device by dropping it in any U.S. post office mailbox! No need to go to the USPS office in person. The mail carrier will return the found item back to the rightful owner at no cost because we know how frustrating it can be when you lose something that's important to you.

Due to high demand, your recovered cell phone may take 3-4 weeks to arrive by return mail. We are working as feverishly as possible to limit the extra wait time you experience. Thank you for using our unique service and for your patience! We promise it will be worth the wait. Using our Lost Cell Phone Return Service is like a prepaid insurance policy, increasing the odds of getting your prized possession back.

Lost Cell Phone Return Service is a unique service that offers guaranteed cash rewards to anyone who finds and returns a lost cell phone or identification device. If you find a cell phone, laptop computer, or uncovered identification tag, please deposit it in any U.S. Postal Service Post Office box. You will have to fill out a claim form online, but your reward will be sent shortly after.

About Pocket Science Inc.

Pocket Science Inc., was founded to overcome the limitations of current mobile messaging solutions and provide access to email anywhere. Through a combination of key technologies, expertise in consumer electronics and electronic messaging, and strategic partnerships, Pocket Science has created its first offering, PocketMail, a low-cost, highly reliable, and convenient mobile email service for people on the go who want to stay connected.
