

# OutLash Beauty Boutique: The Best Destination for Eyelash Extensions and Brow Lamination

**Ontario, Canada Apr 8, 2022 ([IssueWire.com](https://www.issuewire.com))** - The uniqueness of [Calgary lash extensions](#) is that - with their specialized knowledge and customization approach they swear to add volume, fluffiness, and length to your natural lashes. In a recent press interview held in Calgary, Jessica and the manager OutLash Ria answered several questions to the interviewers to let their clients know the secrets of eyelash extensions.

## Q. What Makes You Special in The Industry?

**Jessica:** Our specialization area is what makes us distinct in the market. We offer three distinct types of lash extension solutions to our valued clients and they are categorized as classic lash extensions, volume lash extensions, and mega volume lash extensions.

## Q. Would You Kindly Explain to Them for Your Customer to Know?

**Jessica:** Gladly, In fact, our classic eyelash extensions offer the most natural look of eyelashes and this is done by attaching a single lash to each natural lash. This makes natural lashes look thicker and lengthier. But for those who come to us for volume, as its name implies more than 2 lashes are used for every individual natural lash. This is a perfect solution for women who have scarce or extremely thin lashes or have gaps in them.

## Q. And What About Mega Lash?

**Ria:** Practically, the mega lash is suitable for everyone's lash. For having a mega lash that contains 8 + lashes, the health of the natural lash of the client matters. We suggest mega lash only for customers after evaluation of the ability of their natural lash to withstand the weight.

## Q. What Is the Life Cycle of Lash Extensions?

**Ria:** Let me make this point very clear to women who are planning for lash extensions how long your lash extension will serve you depends on the quality of lashes, the glue used, the expertise of the technician, and finally the aftercare methods followed by one. Our lash extension generally lasts for 5-8 weeks. And this duration is determined from the time they are applied to their final shedding. In general, clients need to return every 2-4 weeks for necessary refilling to retain their lashes look fuller and voluminous.

## Q. Is Eyelash Extension Safe for Skin?

**Jessica:** As long as the quality of lashes and adhesive we use, is 100% safe and will never cause any kind of irritation. Moreover, we fit eyelash extensions with due diligence so that they won't touch your skin but simply sit as natural lashes.

## Q: What Are The Other Areas You Specialize in?

**Ria:** Unsurprisingly, another popular solution is [eyebrow lamination Calgary](#). This is ideal for those who have thinning or unruly brow hair. The objective is to bring them in shape with great that lasts.
