

Patriot Training Center Provides Safe and Elite Firearm Training for Self Protection

Talladega, Alabama Apr 8, 2022 ([IssueWire.com](https://www.issuewire.com)) - An increasing number of people are arming themselves to protect their homes, families, and others. However, without proper training, an individual with a gun is ineffective at best and dangerous at worst. The [Patriot Training Center](https://www.patriottrainingcenter.com/) features elite gun training courses for civilians and provides tactical skills to respond with confidence.

Preserving, protecting, and popularizing The Second Amendment is at the core of the company's mission. Patriot Training Center offers comprehensive two-day entry-level group training sessions in pistol, rifle, or shotgun usage. Courses include in-class information and on-site training to teach attendees how to shoot with extreme accuracy.

All courses are taught by certified instructors with military, security service, or law enforcement backgrounds. Private lessons are also available upon request. Individuals will need their own firearms and other equipment to participate in gun training classes.

During pistol training, individuals learn skills encompassing safe firearm handling and legal considerations for concealed carry. Dry practice methods are offered to improve skills at home. Individuals explore the moral and ethical decisions to use deadly force and students learn to accurately shoot one-handed and on the move.

Ideal for owners of an AR-15, AK-47 or similar semi-automatic rifle, individuals taking the rifle training course learn to shoot from six essential positions and close-quarters combat skills. Students discover the biggest mistake riflemen make, the fundamentals of marksmanship, and the No. 1 secret for rifle accuracy during the rifle training class.

The shotgun training class is designed to teach individuals essential skills that include how to choose the right shotgun for their individual needs and the six types of ammunition to avoid. Rifle care and cleaning are covered for reliable service. Trainers will show individuals how to avoid a painful recoil, deal with multiple intruders, and how transition from a shotgun to a handgun.

Those that purchase tickets to a course of their choice can attend at any time – there's no expiration date. Patriot Training Center also offers a multi-course bundle in which individuals can attend any of the two-day courses as often and as many times as they'd like. The dynamic, reality-based courses at Patriot Training Center provide individuals with the critical training and skills to protect their homes, themselves, and others in a variety of situations and environments.

About Patriot Training Center

Our purpose is to train American civilians to a level of tactical skill and safe firearms handling that's higher than even law enforcement and military standards. We exist to make getting tactical training as popular in America as any other martial art. No matter if it's your first time picking up a gun or you've been shooting your whole life, after your first class at Patriot Training Center, you'll leave with better skills than 99 percent of the gun owners in the world.
