

PixelPlex Introduces Cardano Blockchain Development & Consulting

New York City, New York Apr 15, 2022 ([Issuewire.com](https://www.issuewire.com)) - PixelPlex, leading innovative software development and consulting company, has shared an improved service page for its Cardano blockchain development services. Whatever components a client needs — whether a Cardano decentralized exchange, smart DeFi layer, NFT marketplace, or a wallet — PixelPlex now offers services to provide a feasible development approach.

PixelPlex boasts of being able to take the burden of ideation and tech road-mapping off its clients' shoulders. The company promises to reduce internal workforce time and help create the optimal ROI plan. They hope to achieve this with services ranging from competition and risk analysis, whitepaper development, tokenomics, and tech strategy breakdown.

The company's [Cardano blockchain development services](#) entail them helping customers with custom-building or revamping Cardano solutions, crafting modular architectures, and building tailored protocols and logic. With this blockchain, PixelPlex can build unbreakably authentic and ultimately profitable Cardano smart contracts that are trusted and irreversible. Cardano smart contract audits services include comprehensive code audit, cybersecurity, and energy consumption control as well as NFT and ownership implementation.

The company is capable of NFT metaverse as well as entire ecosystem engineering. This service is all-inclusive with the development and minting of native ADA tokens, NFT infrastructure setup, and audit, campaigning support and providing technical updates.

PixelPlex breaks down its Cardano development process into seven key stages:

- Objectives, requirements & scope analysis
- DApp UI design
- Smart contracts engineering & audit
- DApp functionality & infrastructure development
- Integration of smart contracts front- & back-end
- Test-case-enabled app execution
- Sandbox to main net transfer

It is the mission of the company to help its customers' business grow with Cardano ecosystems as a competitive advantage.

About PixelPlex

PixelPlex is a software development company located in New York. It helps provide solutions to companies and industries through DeFi, IoT, AR/VR, and AI technologies. They also render services like web and mobile app development and consultancy.
