

Sick_Mf_Jay: An Artist From Az Making A Name For Himself

Los Angeles, California Apr 30, 2022 (Issuewire.com) - SICK_MF_JAY is an on the rise recording artist who comes from the Hopi Tribe of Northeast Arizona. Music is something that is close to the heart. Where his passion comes from. Being where he is from it takes real effort just to perform considering his location from the town is quite far, but it is worth living out his dream. SICK_MF_JAY has always been fond of Metal and Rock music. Living in such a secluded area made it hard to find bandmates, but made it easier to write.

KISS has always been an inspiration. It was the first band he laid eyes on. Since then and experiencing his uncle's passion for rock-fueled his inspiration to become a rocker himself. Since pursuing his passion he has performed for many venues including Established Mutilated Music, The Told You So Tour (West Coast) with The Underground Collective, The Speak No Evil Tour (West Coast) with The Underground Collective, as well as his first-ever live even located at Joe's Grotto in Phoenix.

One more tour is in the works which will be disclosed at a later date. SICK_MF_JAY is working on staying consistent and just developing himself as a top-tier artist. His goals are big but certainly

obtainable. Make sure you check out his current catalog and stay up to date on his content.
